PROFESSIONAL SUMMARY

Computer Science graduate skilled in JavaScript, Flutter, HTML, Dart, React, SQL, and Python. Hands-on experience includes building a full-stack e-commerce platform and a mobile healthcare app, with a focus on scalable, secure, and user-centric design. Additional practical experience in IT support, hardware assembly, and system configuration and troubleshooting. Seeking a challenging role as a Mobile App Developer, Web Developer, IT Support Specialist, or Data Analyst

---

EXPERIENCE

Full-Stack Developer | December 2025 – Present
POS
- Enhanced and maintained a mobile application that integrated directly with a .NET-based POS system, enabling synchronized inventory and sales operations across mobile and desktop platforms.
- Extended functionality of a mobile barcode scanner app for real-time product addition/removal, streamlining warehouse operations.
- Contributed to a delivery application with live GPS tracking, enabling real-time order and driver visibility for customers.
- Collaborated within an Agile team to iterate on existing codebases, performing feature development, bug fixes, and UI/UX improvements across all platforms.

Mobile Developer | April 2025 – May 2025 Remotely
XpertBot internship
- Developed a Flutter-based mobile app connecting patients with nurses for consultations and appointments.
- **Flutter & Dart**: Built responsive UI, implemented state management, and designed interactive features.
- **Android Studio**: Used for emulation, debugging, and APK builds.
- **Firebase**: Integrated for secure authentication, real-time chat, cloud database, and cloud functions.
- **Additional Features**: Implemented AI health assistant, emergency location sharing, and appointment scheduling.

Web Developer | February 2025 – March 2025 Remotely
XpertBot internship
- Built a responsive e-commerce platform for mobile and tech devices.
- **React & JavaScript**: Developed dynamic UI components, managed front-end state, and handled user interactions.

- **HTML/CSS**: Created structured, visually clean, and fully responsive layouts.
- **SQL**: Designed and managed product and user databases; wrote queries for data retrieval and updates.
- **Backend Basics**: Implemented user authentication, session handling, and product management logic.

IT Support & Systems Technician | June 2024- July 2024
Alam Al-Forkan NGO Internship
- Provided technical support for educational bootcamps by diagnosing, repairing, and maintaining laptops and desktop computers.
- Assembled and configured PCs from components to meet specific operational needs.
- Troubleshot and resolved software issues, including camera configuration and system optimization.
- Set up and managed networked computer labs, enabling centralized teacher control over student workstations.

EDUCATION

Computer Science
Beirut Arab University | Graduated May-2025
Relevant Courses: Data Structures, OOP, Algorithms, Artificial Intelligence, Cybersecurity, Database Systems…

Web Design Diploma
Imaar training and development
Front-end Development: Built responsive UIs with React, JavaScript , HTML, and CSS

Flutter flow
Advanced Online course

IT diploma
Borderless NGO
Gained foundational IT skills in networking and system administration

---

SKILLS

- Java
- Python
- C++
- Wordpress
- Firebase
- GitHub
- Hardware & Assembly
- Data Encryption (Firebase & SQL)
- Problem Solving

- React
- JavaScript
- HTML
- CSS
- MySQL
- API Integration
- Networking
- Secure Authentication (2FA, Firebase Auth)
- Communication Skills

- Flutter
- Dart
- SQL
- Android Studio
- Git
- Basic Cybersecurity Principles
- Software & Tools
- Teamwork & Collaboration
- Time Mangement

PROJECTS

Personal Health Assistant App

Senior Project | Flutter, Firebase, Android Studio

- Developed a mobile app that connects patients with licensed nurses for appointments and consultations.
- Key features include secure login, real-time chat, Al health assistant, emergency location sharing, and appointment scheduling.
- Built using Flutter for cross-platform Ul and Firebase for backend services (authentication, database, cloud functions).

Tech Device E-Commerce Website

Personal Project | React, JavaScript, HTML/CSS, SQL

- Built a responsive full-stack e-commerce website for selling mobile and tech devices.
- Used React for dynamic UI, SQL for database management, and implemented user authentication and product handling.
