- **Fundamentals** — Data Structures and algorithms ,Operating Systems, Software engineering
- **Other tools** — Linux, GitHub

EDUCATION

Bachelor's in Computer Science

Lebanese University - zahle

September 2022 – August 2025

Master's in Computer Science

Lebanese University - hadath

Present

PROJECTS

Coffee Shop Point of Sale (POS) System

Commercial Project:

- Built a responsive web-based POS using React and TypeScript with features including user authentication, tabbed dashboard navigation, and dynamic product management.
- Implemented sales processing with cart functionality, quantity selection, real-time stock updates, and REST API integration for managing products and processing transactions

To-Do List App

- *Built a full-stack to-do application using Kotlin and XML with integrated database support*
- *·Project guided by a detailed Software Requirements Specification (SRS) document as part of a software engineering course.*

Property Finder

PHP , HTML , CSS and JAVASCRIPT:

- Developed a fully responsive full-stack real estate website
- Demonstrated proficiency in core web development principles and database management

EXPERIENCE

- Worked on web development projects, handling both frontend and backend development.
- Developed and integrated REST APIs to support dynamic data management and client-server interactions.
