Address

Beirut, Lebanon

Education

2024-2027

Bachelor of Computer Science

Beirut Arab University

Expertise

- HTML CSS
- JavaScript
- PHP
- Java
- SQL, MySQL
- Communication
- Time management
- Flutter (Frontend)

Language

English

Arabic

Projects

Developed several academic and practical projects, including an object-oriented Java application, a database system for managing blood donations using SQL, a data structures project focused on playlist management, and a full web-based job portal using HTML, CSS, JavaScript, PHP, and MySQL. Additionally, collaborated in a team to build a Flutter-based coffee ordering mobile application. These projects strengthened my skills in problem-solving, database design, teamwork, and building functional, user-friendly applications.

Leadership and Professional Development

- ❑ Selected for the Aspire Leaders Program (Cohort 5), a competitive global leadership initiative. Gained hands-on experience in leadership development, critical thinking, and professional communication through interactive learning and collaboration with a diverse international cohort.
