Chady Younes

Beirut, Lebanon | chadyyounes2003@gmail.com | +961 81 649 331 | linkedin.com/chady-younes | https://github.com/ChadyYounes

Enthusiastic undergraduate Computer Science student with a keen interest in software development and a solid grasp of programming concepts. I am skilled in building responsive and dynamic web and mobile applications mainly Laravel Api, Node.js, React.js/React Native, MySQL, Git and AI Tools.

EDUCATION

Antonine University | Baabda, Lebanon   **Graduation: May 2025**
Bachelor of Technology in Computer Science

Experience

Basma.com | Gemmayze, Beirut Lebanon   *July 2025 – Present*
Junior Full Stack Developer

- Built and maintained features in a Clinic Portal using Laravel and React.js, including functionality to upload medical consent history to AWS S3 and retrieve them via a CMS dashboard.
- Implemented UI/UX improvements on the Basma website, addressing various design issues to enhance visual consistency and user experience.
- Worked with APIs and optimized queries using Laravel Tinker and Eloquent, debugging and testing application logic directly in the console for faster development cycles, and utilizing Git for version control.
- Developed a webhook that listens to Trello card movements, storing card IDs in the database, and created a Node.js script to process these IDs and fetch related data for thermal printing.
- Participated in daily scrum meetings with the product team to discuss tasks and set priorities.

Inkript | Badaro, Beirut Lebanon   *Dec 2024 – Jan 2025*
Software Development internship

- Updated and refactored Inkript's company website built using PHP CodeIgniter, improving code readability and maintainability.
- Developed a REST API with .NET 8 and integrated it into an Angular 19 frontend, ensuring efficient data handling and user-friendly form validations.

Integrated Digital Systems (IDS) | Jnah, Beirut Lebanon   *May 2024 – July 2024*
Full stack development internship

- Built an event management website using Laravel with a Filament CMS dashboard for seamless admin control and user management, and integrated third-party APIs to fetch various data.

PROJECTS

Wise-Pockets Mobile App (Senior Project)

- Developed a cross-platform financial tracking app using React Native (Expo) with a Laravel 12 backend, allowing users to manage personal or group budgets across multiple wallets, with detailed budget management features.
- Integrated real-time live chat using Laravel Reverb (WebSockets) for user-to-user communication, enabling instant messaging within the app.
- Connected an AI-powered chatbot for financial tips and user support, allowing users to ask budgeting or app-related questions directly within the chat interface.

LANGUAGES

- Arabic (Native), English (Fluent), French (Intermediate)
