

# RAFEH SAAYFAN

## Full-Stack Developer

**Email:** rafehsaayfan@gmail.com | **Phone:** +961 71 412 898 | **Location:** Barja, Mont Lebanon

**LinkedIn:** [linkedin.com/in/rafeh-saayfan](https://www.linkedin.com/in/rafeh-saayfan) | **GitHub:** [github.com/rafeasaayfan](https://github.com/rafeasaayfan)

## PROFESSIONAL SUMMARY

---

Full-Stack Developer with 2+ years of hands-on experience building scalable web applications using Laravel, React.js, Vue.js, and modern JavaScript frameworks. Proven track record delivering production-ready solutions for e-commerce platforms, multi-tenant SaaS applications, social platforms, and enterprise dashboards. Strong expertise in responsive UI development, RESTful APIs, database design, and creating intuitive user experiences.

## PROFESSIONAL EXPERIENCE

---

### Founder

2024 – Present

**Spotly** (In Development) | Testing URL: [spotly.uspot.net](https://spotly.uspot.net)

- Founding and developing a multi-tenant SaaS platform enabling Lebanese businesses to create custom websites (e-commerce, restaurant, blog, clinic) without coding through form-based configuration
- Architected scalable multi-tenant infrastructure supporting multiple business types with isolated databases and custom domains
- I am preparing the environment to integrate Wish Payment in the near future
- Built dynamic template engine generating fully functional websites based on user input and business requirements
- Managing full product lifecycle from concept to deployment including server management, database optimization, and customer onboarding
- Note: Project currently in active development with plans for official domain and public launch

### Freelance Full-Stack Developer

2023 – Present

#### Self-Employed

- Delivered 5+ production web applications for clients across e-commerce, healthcare, laboratory services, and tech platforms using Laravel, React.js, Vue.js, and Next.js
- Developed complete e-commerce solution for [aboulira.com](https://aboulira.com) (motorcycle parts retailer) including shopping cart, checkout flow, order tracking system, inventory management, and dynamic product catalog
- Transformed complex Figma designs into pixel-perfect responsive interfaces for [tiflicare.com](https://tiflicare.com) healthcare platform using React.js with focus on cross-browser compatibility and mobile responsiveness
- Built comprehensive application form management system for [casmnet.net](https://casmnet.net) laboratory including data validation, workflow automation, and administrative dashboard
- Created enterprise-level multi-dashboard interface for Techryt (in development) using Next.js featuring role-based access control, real-time data visualization, and modern UI/UX patterns
- Completed various development tasks for Plasticconnect as first professional client engagement
- Developed reusable DataTable component library with sorting, filtering, pagination, and export functionality reducing development time by 40% across projects
- Collaborated with cross-functional teams using Git version control, conducted code reviews, and maintained documentation for knowledge transfer

## EDUCATION

---

### Bachelor of Science in Computer Science

2021 – 2024

Islamic University of Lebanon (IUL), Wardeniye

## TECHNICAL SKILLS

---

**Frontend Development:** HTML, CSS, JavaScript, TypeScript, React.js, Vue.js, Inertia.js, jQuery, AJAX, Axios, Bootstrap, Tailwind CSS

**Backend Development:** PHP, Laravel, RESTful API Design

**Database:** MySQL

**Tools & Version Control:** Git, GitHub, GitLab, Postman

**Additional Technologies:** Next.js, Linux

**Programming Languages (Academic Knowledge):** C++, Python, Java

## PROJECTS

---

### B2B Promotion Engine – Rule-Based Discount System

[View on GitHub](#)

Technologies: Laravel 11, React (Vite), Tailwind CSS, Python, MySQL, json-rules-engine, RESTful API

- Built flexible B2B eCommerce promotion engine with custom PHP and Python rule engines for dynamic discount evaluation
- Implemented structured JSON-based rule system supporting condition-action logic, salience priority, and stackable flags
- Integrated dual engine architecture: json-rules-engine for frontend validation and custom Python engine for backend processing via Laravel API

### FoodFinder – Food Ordering System

[View on GitHub](#) | Technologies: Laravel, Tailwind, JavaScript, jQuery, AJAX, MySQL

- Created multi-role platform with dashboards for Admins, Restaurant Owners, and Customers featuring order tracking and mobile WebView

### CodeVerse – Code Snippet Sharing Platform

[View on GitHub](#) | Technologies: Laravel, Tailwind CSS, Prism.js, MySQL

- Built code repository with syntax highlighting, live preview, advanced search, and admin moderation workflow
- Completed as university capstone project after 3-month team training program

### DocBooker – Clinic Appointment System

[View on GitHub](#) | Technologies: Laravel, Tailwind CSS, jQuery, AJAX, MySQL

- Developed appointment booking platform with real-time scheduling, availability management, and instant confirmation system

### MediaApp – Social Media Platform

[View on GitHub](#) | Technologies: HTML, CSS, jQuery, AJAX, Bootstrap, PHP, MySQL

- Built social networking platform with user authentication, media sharing, and real-time interactions (likes, comments, favorites)

## ADDITIONAL INFORMATION

---

- Strong problem-solving skills with ability to learn new technologies quickly and adapt to project requirements
- Experience with Agile development methodologies and collaborative team environments
- Passionate about clean code architecture, UI/UX design principles, and web performance optimization
- Active on GitHub maintaining open-source projects and contributing to developer community
