Professional Summary

Motivated Computer Science graduate with hands-on experience in Laravel backend development and full-stack web applications. Strong foundation in PHP and MySQL, with practical experience building MVC-based systems, implementing authentication, role-based access control, and CRUD operations. Seeking an internship or junior position to grow as a backend web developer.

Technical Skills

Backend: PHP, Laravel, MySQL
Frontend: HTML5, CSS3, Bootstrap, JavaScript
Programming: Python, Java, C++
Concepts: MVC Architecture, CRUD Operations, Authentication, Role-Based Access Control
Tools: Git, GitHub, Blade Templates, REST basics

Experience

Laravel Web Development Intern – Zeesweb (May 2025 – July 2025)
- Developed a full-stack blog management system using Laravel and MySQL following MVC architecture
- Implemented CRUD operations for posts, categories, and authors
- Built authentication systems with role-based access control (admin & author roles)
- Designed responsive admin dashboards using Bootstrap and Blade
- Tested and deployed features in local and staging environments

Projects

Blog Management System (Laravel)
- Built a full-stack blog platform with secure login and role management
- Admin manages posts, categories, and authors
- Authors can manage their own posts
- Technologies: Laravel, PHP, MySQL, Blade, Bootstrap

Education

Bachelor of Science in Computer Science
Al Jinan University — Graduated 2025
