Computer and Communication Engineering
Specialization in Software Engineering

WORK EXPERIENCE

Telecom Support Technicien

Ordre de Malte

Lebanon

2022

- Provided troubleshooting assistance for system errors to telecom engineers in several regions.
- Managed the installation and configuration of new computers along with software systems.
- Provided support in downloading, setting up, and smooth operation of new systems.
- Carried out system formatting and maintenance as needed to enhance performance.

C# Web App

Lebanon

28/7/2025 To 7/9/2025

- Developed a web-based Invoice Analyzer Tool using C# (ASP.NET Core), Razor Pages, and SQL Server.
- PDF/CSV parsing for supplier, invoice, and item information extraction with validation.
- Automate the check of suppliers/items, database updates on missing records accordingly.
- Provided a user-friendly interface for uploading, previewing, and validating the invoice.
- Better error handling and AI-assisted parsing of files

Project University

Lebanon

1- Mug Heater Project (2024)

- Designed and developed an electronic mug heater using Arduino.
- Integrated temperature sensors and programmed the microcontroller to regulate heat.

2- MyInvoice Website (2025)

- Designed and implemented a multi-role financial management web application to manage income, expenses, and invoices.
- Designed a scalable interface using React, along with role-based dashboards and modules.
- Enhanced financial reporting through organized data, filters, and summaries.

ANTONINE SISTERS SCHOOL

Hazmieh-Jamhour
Lebanon

2020

High School Diploma

- Graduated with Honors

Saint Joseph University of Beirut

SKILLS

PYTHON

C++

CISCO

JAVA

ABOUT ME

Dedicated student of Software Engineering and Communication, passionate about innovation and everything related to technology. My goal is to excel in my field and be one of the leading engineers, contributing to impactful projects that shape the future. I am driven by curiosity and a desire for continuous learning and growth, embracing challenges that help me develop both technically and creatively. I work well in a team-oriented environment and am looking forward to working on boundary-pushing solutions with the purpose of making a difference in the world
