

# Hussein Hijazi

Software Engineer | Full-Stack Developer

Beirut, Lebanon

81066457

husseinjihadhijazi2004@gmail.com

## EXPERIENCE

### CME , Beirut, Lebanon — Software Development Intern

July 2025

Developed and maintained full-stack web applications using the MERN stack. Built responsive user interfaces with React and Material-UI, created RESTful APIs with Express and Node.js, and managed data storage using MongoDB. Collaborated with the development team following Agile practices and used Git for version control to ensure efficient project delivery.

## EDUCATION

### Lebanese International University, Beirut, Lebanon — Bachelor of Science in Computer Science | 06/2025

09/2022- 06/2025

Graduated with a GPA of 3.85/4.0, consistently ranked among the top students in the Computer Science department, and recognized on the Dean's List for academic excellence.

## PROJECTS

### Travel Assistant Web App — MERN Stack, OpenAI API

Built a conversational assistant that helps users find flights, hotels, and restaurants, integrating structured JSON replies and external APIs to deliver real-time data.

### Weather Application — MERN Stack

Built a web application that provides personalized 7-day weather forecasts and hourly updates, implementing user authentication with role-based access for secure and tailored experiences. Added save-location and quick-access features to let users store and quickly retrieve favorite destinations.

## SKILLS

- Programming Languages: Java, JavaScript (ES6+)
- Web Development: React.js, Node.js, Express.js, HTML5, CSS3
- Databases: MongoDB, MySQL
- Frameworks & Tools: Spring Boot, Git, GitHub
- Methodologies: Agile / Scrum

## OBJECTIVE

Ambitious software engineer with experience in full-stack and backend development, aiming to contribute to innovative projects while enhancing technical expertise. Looking to grow into a backend engineering specialist and eventually take on leadership responsibilities within a development team.

## LANGUAGES

Fluent in English and French
