Objective

Computer Science graduate with hands-on experience in backend and mobile application development using Django REST Framework, FastAPI, and Node.js. Familiar with DevOps fundamentals including Docker, AWS deployment, and basic CI/CD practices. Eager to contribute to innovative projects and grow as a Backend Developer or Full Stack Mobile Developer by building efficient, scalable, and user-focused applications.

Education

Islamic University in Lebanon – Tyre Bachelor of Science in Computer Science 2022 – 2025

Experience

Internship: Full Stack Mobile Developer | Violet Programming

Jan/2026 –present Tyre

- Develop an E_commerce mobile application using flutter.
- Build a Backend for delivery application using Laravel and design the database for it.
- Deploy the database online and integrate it.
- Tested the APIs using postman and connect it with frontend.

Skills

Programming Languages: python, JavaScript, Dart, php

Frameworks: Django rest framework, FastAPI, Node.js, Express.js, Laravel, Flutter.

Databases: MySQL, PostgreSQL, Firebase, MongoDB

DevOps & Cloud: AWS, Docker, CI/CD, Linux, Bash.

Tools: Vs code, Git and GitHub, Postman

Other: RESTful API, AI Integration

Projects

Backend Tourism app

FastAPI, PostgreSQL

Developed RESTful APIs to manage destinations, tours, and bookings with optimized database relationships and a focus on scalability and performance. ([GitHub](#))

Backend delivery app

Laravel, mysql

Built RESTful APIs for users, shops, orders, and deliveries with authentication, order lifecycle management, and secure relational database design. ([GitHub](#))

Backend social media app

FastAPI, PostgreSQL

Implemented JWT authentication and RESTful APIs for users, posts, and comments, focusing on clean architecture and database optimization. ([GitHub](#))

Backend Management System

Node.js, Express.js, MySQL

Developed a secure backend API with authentication and CRUD operations for an admin dashboard and user management system. ([GitHub](#))

LB Sports (Graduation Project)

Flutter, Firebase, API Integration

Built a mobile app for Lebanese football with live matches, news, role-based access, and Firebase authentication, database, and notifications. ([GitHub](#))

E-Commerce Mobile App (Store)

Flutter, Firebase, Provider

Built a complete shopping app with product listings, cart functionality, and user authentication. Included dynamic UI, responsive design.
