PROFILE

Computer Science undergraduate with a solid interest in technology, software development, and problem-solving. Familiar with core programming and web technologies, and motivated to apply academic knowledge in a real-world setting. Eager to learn from experienced developers, contribute to team-based projects, and grow professionally through a hands-on internship experience..

WORK EXPERIENCE

BOOKING AGENT

DictaLive

April 2025- 27 Feb 2026

- Supported daily operation of specialized healthcare software systems by managing appointments and ensuring system reliability during use.
- Collected, verified, and maintained sensitive patient data with a strong focus on accuracy, organization, and data confidentiality.
- Assisted users (patients and staff) in navigating digital systems by providing clear instructions and resolving basic technical or usage issues.
- Worked with computer workstations, headsets, and internal systems, ensuring proper setup and smooth operation for daily tasks.
- Coordinated with internal departments to optimize digital workflows and reduce scheduling and system-related errors.
