[Mohammed El-Laden](#)

PROFESSIONAL

Full Stack development using React, Node.js, Express, and Firebase

Design and implementation of RESTful APIs and microservices

Strong understanding of SDLC, clean architecture, and best practices

Performance optimization and maintainable code design

Experience working in remote and cross-functional teams

Able to work under deadline pressure.

Problem-solving mindset with strong debugging skills

REFERENCES

Available on request.

PROFILE

Full Stack Developer with 4+ years of experience designing, developing, and integrating scalable web applications using Node.js, Express, React, and Firebase. Strong understanding of system architecture, microservices, SDLC, and performance optimization. Proven ability to translate business requirements into technical solutions, collaborate across teams, and deliver maintainable, high-quality software.

CAREER

April, 2025 - Present

GAO Tek Inc. – Web Development (remote, Canada)

Contributed to the development and customization of full-stack web components, working across front-end and back-end layers.

Customized WooCommerce workflows using PHP, JavaScript, and CSS, aligning technical implementations with business requirements.

Improved code maintainability by modularizing UI components and reusable logic hooks.

Collaborated with stakeholders to translate functional requirements into technical solutions and documented changes following internal standards.

Participated actively in the software development lifecycle, including requirement analysis, implementation, testing, and deployment support.

May, 2021 – April, 2025

Full Stack Development (Calgary, AB, Canada)

Designed and implemented Node.js microservices and REST APIs for multiple academic and personal projects.

Built React SPAs with routing, state management, and performance-focused component design.

Applied modern JavaScript (ES6+), async programming, and clean architecture principles.

Integrated Firebase services (Auth, Firestore) for secure, scalable backend functionality.

Focused on performance optimization, code quality, and maintainable architecture.

June, 2023 -Nov, 2024

Technical Operations Roles (Calgary, AB, Canada)

Designed a QR-based digital workflow to improve operational reporting efficiency.

Worked in environments requiring strict quality control, documentation, and cross-team coordination.

SKILLS

Programming Languages: C#, C++, Java, PHP, TypeScript, JavaScript (ES6+), async/await, modern JS patterns

Front-end Development: HTML5, CSS, SASS, Bootstrap, React (Hooks, Context API), React Router, SPA architecture,

Back-end Development: .NET Core, SQL, GraphQL, Node.js, Express.js, REST APIs, Microservices, Firebase Cloud Functions, Auth

State & Data: Context API, Redux (fundamentals), Firestore, SQL (fundamentals)

Testing & Quality: Unit testing concepts, manual testing, debugging, QA readiness

DevOps & Tools: Git, GitHub, CI/CD fundamentals, Azure basics

ACADEMIC

2020 - 2024

Lebanese International University Bachelors' Degree in Computer Science

International Qualifications Assessment Service (IQAS) Bachelors' Degree in Computer Science

CERTIFICATES

Cisco CCNA 1: Introduction to Networks

Cisco CCNA 2: Switching, Routing, and Wireless Essentials

Cisco CyberOps Associate

LANGUAGES

Native in English (written and spoken)

Native in Arabic (written and spoken)

PROJECTS

Fuel delivery app (React Native, Firebase, Stripe, Maps)

Golf Gt website
