Summary

Backend Developer specializing in Node.js and PHP with hands-on experience in scalable APIs, e-commerce platforms, and warehouse management systems. Recently entered the field of Artificial Intelligence, completing projects in supervised and unsupervised learning. Seeking to contribute technical expertise and problem-solving skills to innovative backend and AI-driven solutions.

Education

- **Masters in Computer Science** - Lebanese University (LU) - (2023 - 2024), Tripoli
- **Bachelor's in Computer Science** - Lebanese University (LU) - (2020 - 2023), Tripoli
- **Lebanese Baccalaureate** - Iman Islamic Schools (General Science, 2017 - 2020), Tripoli

Experience

Full Stack Developer (Next.js & Laravel) –Algorithm (10/2025 – Present), Hybrid

- Developing applications using Next.js (frontend) and Laravel (backend).
- Building reusable UI components, API integrations, and SSR logic.
- Creating secure REST APIs and role-based authentication in Laravel.
- Managing SQL databases and optimizing backend performance.
- Integrating third party services and deploying apps on cloud platforms.
- Ensuring clean code and version control best practices.

OpenCart Full Stack Developer (MVC) – Zymta Home (06/2024 – 02/2025), Tripoli

- Developed and optimized backend APIs for product & warehouse management.
- Implemented Redis caching improving API response by 30%.
- Integrated extensions, widgets, and banners for better UX.
- Built Warehouse Management System (WMS) with PDA integration.
- Collaborated with teams to troubleshoot backend issues.

Internship – DMP Soft (05/2023 - 02/2024), Remote

- Strengthened backend foundations with Laravel and databases (SQL & MongoDB).
- Developed responsive web features using HTML, CSS, JavaScript.

Projects

- **E-commerce Platform (MERN Stack with TypeScript) – (04/2025 – 06/2025):** Developed authentication, product catalog, cart, payments, and admin dashboard.
- **E-commerce Project (Laravel):** Built admin dashboard for managing users, products, orders, and payments.
- **Blogging Platform (Laravel):** Enabled user posts with images, edit/delete, and full article views.

Certifications & Training

AI Engineer Program – with Lara Wahbi (07/2025 – Present)

- Covered advanced topics in Machine Learning, including Supervised and Unsupervised Learning.
- Applied concepts through projects such as Titanic Survival Prediction and Credit Card Anomaly Detection.
- Currently progressing into Large Language Models (LLMs) and prompt engineering.

MERN Stack Development – Udemy (02/2025 – 06/2025)

- Built full-stack applications using MongoDB, Express.js, React.js, and Node.js.
- Implemented authentication, RESTful APIs, state management, and deployment workflows.
- Developed a complete E-commerce project with product catalog, cart system, checkout, and admin dashboard.

Technical Skills

- **Backend:** Node.js, TypeScript, Express.js, REST API, Laravel, OpenCart
- **Databases:** MongoDB, SQL, Firebase, Redis Cache
- **Frontend:** React.js, Angular, HTML5, CSS, JavaScript, Next.js
- **Tools:** Git/GitHub, Docker, Trello, Visual Studio, Android Studio, Cursor
- **Cloud:** AWS (basic knowledge)

Languages

- **Arabic:** Native
- **English:** Advanced
- **French:** Intermediate
