---

## SUMMARY

Junior Software Developer with a strong foundation in software engineering, databases, and structured systems. Hands-on experience building CRUD-based applications, working with SQL databases, and debugging backend logic. Motivated to grow in a software implementation environment and contribute to reliable, maintainable solutions.

---

## SKILLS

- **Programming & Frameworks:** C#, ASP.NET Core, .NET Framework, JavaScript, TypeScript, React, HTML5, CSS3. Familiar with Java fundamentals and object-oriented programming concepts
  - **Backend & Systems:** RESTful APIs, CRUD operations, backend logic implementation, error handling, access control
  - **Databases:** SQL Server (MSSQL), PostgreSQL, MySQL — schema design, queries, data validation
  - **Engineering Practices:** Object-Oriented Programming (OOP), debugging & troubleshooting, basic unit testing, Git, Agile/Scrum, clean and documented code
  - **Operating Systems:** Windows, basic familiarity with UNIX-based environments
- 

## WORK EXPERIENCE

### Research and Development Internship, Integrated Digital Systems

Sep 2025 - Sep 2025

- Developed and maintained database-backed software components using structured workflows.
- Implemented CRUD operations to create, update, and manage system records.
- Worked with SQL databases to organize, clean, and validate structured datasets.
- Ensured data integrity, access control, and proper error handling within backend logic.
- Translated functional requirements into working software features through analytical problem-solving.
- Debugged issues and improved system reliability in collaboration with technical team members.

### Private Tutoring, Self-Employed

Feb 2025 - Jun 2025

- Explained programming, database, and analytical concepts in a clear, structured manner.
- Broke down complex technical problems into logical, step-by-step solutions.
- Strengthened communication, documentation, and requirement explanation skills.

### Sales Representative, Go Outlet

Aug 2023 - Nov 2024

- Maintained accurate digital and financial records in fast-paced operational systems.
  - Worked with structured data and daily reporting under time pressure.
  - Strengthened discipline, accountability, teamwork, and communication in a production environment.
- 

## EDUCATION

### Bachelor's of Science in Bioinformatics: Lebanese American University

Sep 2020 - Jun 2024

- Databases & SQL Programming / Data Analysis & Statistics
  - Applied Computational Methods / Problem Solving in Structured Systems
- 

## COURSES

- **Robotics 1-month training program : MUC**
- **Resilient Leadership Course: Harvard Online**
- **Exercising Leadership, Foundational Principles: Harvard Online**
