PROJECTS

Lebanon-Short Stay Market Scraping and Analysis

- Built a fully interactive app to visualize insights about the Lebanese short-stay rental market, the data was scraped (Selenium) from multiple websites, cleaned, analyzed and translated to meaningful insights

Vizu - Full-Stack Video Streaming Website

- Youtube-style video streaming platform featuring video upload and playback, user authentication, channel system, email integration and an admin panel using Laravel.

Intelligent Health Symptom Checker Website

- Final year project (In progress).
- Developing an AI-powered web application that uses Natural Language Processing (NLP) to interpret user-described health symptoms and provide personalized, evidence-based insights. The system analyzes contextual factors such as age, gender, and medical history to suggest possible conditions and recommend whether professional medical advice is needed.

ACADEMIC HISTORY

Rafik Hariri University | 2023-2026

Bachelor Degree in Computer Science

- GPA: 89 / 100
- President's Honor List
- Dean's Honor List (x3)

Kfarhim Official Secondary School | 2020-2023

Life Science

- Official Exams Grade: 18.07 / 20

CERTIFICATIONS

Complete Data Science Bootcamp | Udemy

Leetcode Bootcamp | Rafik Hariri University

Microsoft Certified Power BI Analyst (In progress)
