PROFILE

Full Stack Developer with 3+ years of experience designing, developing, and deploying scalable web and mobile applications, with a strong focus on performance, usability, and real-world results.

EXPERIENCE

WAYZ, Hazmieh - Beirut - Tech Lead/Developer | OnSite

December 2024 - present

- Contributing to the development of the company's core SaaS product using the MERN stack with Next.js for the frontend, Express.js for the backend, and MongoDB for the database, leveraging Inversify for dependency injection to decouple backend services.
- Mentor junior developers and streamline onboarding through technical documentation and process optimization.
- Developed dynamic, SEO-optimized front-end interfaces with Next.js, utilizing server-side rendering (SSR) and API routes to enhance performance and user experience.
- Developed dynamic, high-performance mobile interfaces with React Native, optimizing rendering, navigation, and network requests to elevate responsiveness and user experience

TechnoLeb, Jounieh - React Native Expo Developer | Remote

December 2023 - November 2024

Developed and maintained mobile applications using React Native Expo, focusing on clean UI/UX and reliable performance.

Implemented customer service protocols that improved response times and satisfaction ratings, enhancing brand loyalty.

Freelancer - MERN Stack (web and mobile)

June 2023 - present

Manage multiple projects simultaneously to ensure timely completion and client satisfaction.

Oversaw the publishing of mobile applications to Google Play and the Apple Store while staying up-to-date with app store policy changes.

Trainee, Codi Tech, Tripoli Al Mina - Full-stack Web

Development Program | Onsite

November 2022 - June 2023

Developed and maintained web applications in a cross-functional team using React.js, Node.js, and MongoDB.

Developed English language proficiency and acquired valuable soft skills, including time management & leadership.

Participated in all software development life cycle phases, ensuring the successful delivery of top-quality software solutions.

SKILLS

Nodejs, Expressjs, Nestjs, PHP, Laravel, SQL, MongoDB, MySQL, PostgreSQL, ASP.NET, SQL
Reactjs, Nextjs, Typescript, React Native Expo, MUI, MobX, Redux, Zustand, WordPress, Agile Methodology, GitHub Actions, Jest

PROJECTS

React Native Stack - WAYZ Services

A mobile app built for everyday users who need help with things like repairs, installations, or other services.

Customers can easily post what they need done, choose the type of service, and get matched with skilled contractors who can solve their problem. It's designed to make finding help fast, simple, and reliable.

React Native Stack - WAYZ Contractor

This app is made for contractors who want to find work.

They can browse tasks posted by customers, buy coins to apply for jobs, and chat directly with the customer to offer their help. It's a practical tool for professionals to grow their business and stay connected with clients.

MERN Stack - WAYZ Admin Dashboard

A secure website for platform admins to manage everything behind the scenes. They can create service categories, track what's happening on the app, manage users, and keep the system running smoothly. It's built with strong security to protect all the data and give admins full control over both the customer and contractor apps.

React Native Stack - EasyLaws (Available on [Android](#) / [IOS](#))

This app breaks down legal information into simple questions and answers, so anyone can understand their rights and the law without needing a lawyer. It's designed to make legal knowledge easy to access and less intimidating for everyday people.

MERN Stack - Scorin - Individual Effort

A straightforward booking app for football lovers. Users can find and reserve football fields for their games with just a few taps. It's all about making it easier to organize matches and enjoy the sport without the hassle.

MERN Stack - Wobble - Team Effort (Available on [And](#) / [IOS](#))

A taxi app that lets users order a ride and chat with the driver during the trip. It's built to make transportation smoother and more personal, with real-time communication and easy booking.

MERN Stack - Wobble Driver - Team Effort (Available on [And](#) / [IOS](#))

This is the driver's version of the Wobble app. It helps drivers manage their trips, see where to pick up passengers, and where to drop them off. It's designed to keep things organized and efficient for drivers on the road.

EDUCATION

BS Computer Science, LU

2018 - 2023
