2019-2022

- Trained new employees on service standards, safety procedures, and POS systems
- Worked collaboratively with colleagues to ensure efficient service and achieve team goals
- Provided excellent customer service, handling customer transactions and resolving issues in a timely manner.
- Managed cash register, processed transactions accurately, and maintained a high level of customer satisfaction.

SKILLS

Computer Skills: Proficient in Microsoft Office (Word, PowerPoint, Outlook, Excel)

Programming Languages: Python, Java, C/C++, php

Web Development: HTML, CSS, JavaScript

Tools & Tech: Git, Linux, VS Code, Arduino

Concepts: OOP, Databases (SQL), Microcontrollers

PROJECTS

Smart Home Automation System

- Developed a home automation prototype using Arduino, sensors, and relays
- Controlled appliances via mobile app interface using Bluetooth module

Gym Membership Management System

- Built a desktop Java application using Java Swing
- Implemented CRUD operations with GUI

Electronics E-Commerce Website

- Built a full-stack e-commerce platform with admin dashboard using **HTML, CSS, JavaScript, PHP, AJAX, and SQL**.
- Implemented product management, order tracking, and dynamic user interactions.
- Designed responsive UI for desktop and mobile
- Implemented login/authentication system

Electronics Shop Mobile Application (Android)

- Developed a native Android application for browsing and purchasing electronic products.
- Implemented product listing, detailed product views, and shopping cart functionality.
- Built the app using **Java and Android Studio**, following Android UI/UX best practices.
- Integrated local data handling and user interactions using Android components (Activities, Intents).
