## SUMMARY

Expert in game development using Unity Engine (2years) c# for unity, worked on multiple game.

Blockchain engineer and Security Researcher (EVM) using Solidity, Yul with foundry, brownie (python) for web3 and Javascript/Typescript for web2, participated in multiple competitive audits for web3 in code4rena, sherlock..

AI enthusiast.

## SKILLS

- **Unity (C#)** — gameplay mechanics,multiplayer sync,blockchain interaction,NFT,Token,UI design,SFX implementation,VFX.
- **Debugging & Optimization** — strong problem-solving and code debugging experience.
- **Blockchain & Dapp** — a strong foundation in smart contract development and web3 infrastructure.
- **C#** — Architecting game ai , enemies,npcs using the industry standards and best practices for natural human like characters.
- **Solidity/ Yul** — a strong foundation and advanced skills at developing and reviewing codebases using the industry best practices.
- **Rust** — basics and still learning lately.
- **Javascript/Typescript** — web development using javascript/typescript (nodejs , nextjs,viem,ethers) for backend/frontend and ofc **HTML and CSS**
- **Python** — blockchain games , web3 onchain/offchain interaction, AI applications
- **PowerShell** — a good foundation in powershell (PS1) for systems management and tools synchronization.
- **Arabic** — my native language..
- **English** — great english skills i can talk/chat and really anything in english language.
- **Japanese** — good at japanese Still learning but have a good basics and can understand japanese to some point and make some basic chats using it.
- **French** — good foundation at french can make basic chats / talk with french people and getting better everyday.

## EXPERIENCE

worked with teams on multiple project (games , web application ,Dapp , web3 Security Review)

### Projects

**Game Development** : worked on 5 different games found at : <https://gamedevali.itch.io>

**WebApplication / Dapp: AI Crypto Trading Cortex:** the app is an agent that trades Eth and make decision swaps(buy/sell) on its own without any human interaction except for signing transactions just connect to the agent and let it trade for you...can be found at <https://ai-crypto-cortex.netlify.app/> and the codebase at Github: <https://github.com/aliabouzeids/Crypto-Cortex>

## EDUCATION

**High School Graduate At 2020**

**Public institute of Baalbek** —IT studies TS2 official Certification
