Full-Stack Web Developer with hands-on experience building and maintaining scalable web applications using the MERN stack. Skilled in delivering high-quality solutions, collaborating with cross-functional teams, and implementing best practices in coding, testing, and deployment.

Work Experience

Full Stack Developer at Orders Offshore | June 2025 – Present

- Develop, enhance, and maintain websites for multiple companies, ensuring scalability, performance, and responsive design.
- Build and improve full-stack applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering reliable solutions aligned with business goals.
- Implement new features, optimize code, and troubleshoot issues to improve functionality and user experience.
- Collaborate with designers, content creators, and management to translate requirements into technical solutions.
- Manage external client projects, from planning and development to deployment and post-launch support.
- Integrate third-party APIs and tools to extend system functionality and enhance features.

Senior Audience, Content & Research Officer / Web Developer at One World (1W) | January 2022 – May 2025

- Create and edit content for various media channels, including websites, magazines, and social media platforms.
- Ensure high editorial standards across digital and print formats.
- Implement minor updates and improvements to websites, maintaining functionality, resolving technical issues, and ensuring a smooth user experience.
- Monitor website performance, promptly addressing issues and collaborating with digital teams to integrate content and enhance user engagement.

Full Stack Web Developer at Codi-Tech | August 2023-February 2024

- Developed full-stack applications using the MERN (MongoDB, Express.js, React, Node.js) stack, optimizing performance and scalability.
- Created responsive and user-friendly front-end interfaces with React, enhancing user experience.
- Built server-side applications and RESTful APIs with Node.js and Express.js, ensuring seamless communication between client and server.
- Managed data storage using MongoDB and SQL, implementing efficient and scalable solutions across various projects.
- Contributed to the development of e-commerce features, such as product listings, shopping carts, and secure payment gateways.
- Applied web security best practices to protect sensitive data in fintech projects.
- Collaborated with cross-functional teams to understand project requirements and deliver high-quality solutions on time.
- Implemented data validation techniques to maintain data integrity in database interactions.

- Conducted code reviews, debugging, and troubleshooting to uphold code quality and project stability.

Fleet Supervisor at The Pharaon Logistics | September 2021 – June 2022

- Hired, monitored, managed and supervised the performance of the drivers while taking responsibility for the safety and legal performance of the drivers.

Home Service Representative at LibanPost | May 2017 – August 2021

- Liaised between the customers and the company on the customer service level.
- Acted as the center for the coordination among the different departments internally regarding the assigned tasks and services in the department.
