

# Abdullah Fahmi

Full-Stack Developer

Beirut, Lebanon | +961 78 803 024 | [abdullahfahmi222@gmail.com](mailto:abdullahfahmi222@gmail.com) | [GitHub](#)

## Summary

---

Full-Stack Developer with hands-on experience building and scaling a high-traffic delivery platform. Skilled in React, TypeScript, GraphQL, and AWS serverless architecture. Proven ability to integrate complex payment systems, build real-time features, and collaborate with cross-functional teams including UX/UI, QA, and product management. Strong problem-solver who thrives in fast-paced startup environments with limited resources.

## Experience

---

### Full-Stack Developer — Gozilla Delivery

January 2024 – February 2026 | Beirut, Lebanon

- Built and maintained features across customer app, driver app, and partner dashboards using React, TypeScript, GraphQL, and AWS serverless architecture
- Developed and managed the logistics dashboard and driver app, including real-time tracking features
- Integrated multiple payment providers and wallet systems including OMT Lebanon and BOB Finance, handling settlement flows and API implementation
- Built wallet-to-wallet transfers and payment method management across platforms
- Implemented and maintained third-party API integrations (payments, geolocation) with ongoing maintenance and optimization
- Assisted in building the in-app chat support feature
- Resolved client app tickets and debugged issues across platforms to improve app stability and user experience
- Developed internal dashboards and scheduling tools with advanced data management capabilities
- Performed regular app updates, debugging, code optimization, and feature releases across mobile and web
- Worked with DynamoDB for data persistence, AWS Lambda for serverless functions, and S3 for file storage
- Collaborated closely with cross-functional teams including UX/UI designers, QA engineers, Project and Product Managers, senior developers, and CTO

## Technical Skills

---

**Languages:** TypeScript, JavaScript, Java

**Front-end:** React, React Native, Redux, Material UI

**Back-end:** Node.js, GraphQL, Spring Boot, Elasticsearch

**Databases:** DynamoDB, MongoDB, MySQL

**Cloud & DevOps:** AWS (Lambda, S3, DynamoDB), Serverless Framework, Docker, Git

**Testing:** Jest, JUnit, Mockito

## Projects

---

### Recipe Management App — Spring Boot, Spring Security, MongoDB, Docker, Mockito

- Back-end application with secure authentication/authorization, containerized deployment, and comprehensive unit test coverage

### Event Management App — Java, JavaFX, MySQL

- Desktop application with advanced GUI design patterns, stored procedures, and database triggers for event CRUD operations

## Education

---

### Bachelor of Science, Computer Science

Lebanese University — Graduated November 2023

**Relevant Coursework:** Web & Mobile Development, Software Engineering, Relational Databases, Design Patterns, Network Security, Linux OS

## **Languages**

---

English (Fluent) • Arabic (Native)
