## CAREER OBJECTIVES

Financial engineering senior student with solid skills in corporate finance, financial modeling, econometrics, and data analysis. Gained hands-on experience in financial reporting, data management, problem-solving, and teamwork through internships and university projects. Proficient in Excel, EViews, and quantitative analytical tools, with strong attention to detail and the ability to work under pressure in fast-paced environments. Motivated to grow into roles within investment banking, asset management, or corporate finance, with the long-term goal of building a successful career in high-level finance.

## EDUCATIONAL BACKGROUND

Bachelor of Business Administration in Financial Engineering  
Notre Dame University Zouk Mosbeh, Lebanon

Expected graduation May 2026

## UNIVERSITY PROJECTS

*The Effect of CO2 Emissions, Population Growth and Renewable Energy Consumption on GDP per Capita*

Intro to Econometrics

Nov 2025

Analyzed the impact of CO2 emissions, population growth and renewable energy consumption on GDP per capita in selected MENA countries using Ordinary Least Squares (OLS) regression in Eviews.

*Key responsibilities:*

- Collected, cleaned and organized economic data
- Applied OLS regression to model variable relationships
- Conducted diagnostic tests to ensure the reliability and validity of regression results
- Interpreted results and prepared visual summaries for clear communication
