SUMMARY

Computer Science student with a strong foundation in backend development and databases. Experienced in designing relational database systems and eager to build scalable backend services. Highly motivated to learn cloud technologies, distributed systems, and modern DevOps practices in a fast-paced engineering environment.

TECHNICAL SKILLS

Languages: C, Java, Python

Databases: SQL, Microsoft SQL Server

Tools: Git, Linux

Concepts: Data Structures, APIs, Database Design, Problem Solving

PROJECTS

Crime Reporting System

- Designed and implemented a relational database system for managing user-submitted crime reports.
- Created ER diagrams and transformed them into normalized database schemas.
- Built and managed the database using Microsoft SQL Server, ensuring structured and efficient data storage.
- Focused on data organization to support scalable backend operations and future API integration.

EDUCATION

Bachelor of Computer Science – Lebanese International University (2022 – 2027)

GPA: 3.4

Relevant Coursework: Software Engineering, OOP, Database Systems, Data Structures & Algorithms

LANGUAGES

Arabic (Native), English (Fluent)
