

AYA AL-FOUT

Address: Beirut, Lebanon | Phone Number: +961-76 828 424

Email Address: aya.alfout@gmail.com | LinkedIn: [Aya Al-Fout](#)

EDUCATION

From 09/2016 to 12/2019 **American University of Beirut (AUB)** Beirut, Lebanon
Bachelor Degree in Computer Science
Date of Graduation: December 2019

EXPERIENCE

From 09/2024 to present **CME**
Software Engineer

- Developing and maintaining dynamic, responsive front-end applications using Angular frameworks.
- Collaborating with cross-functional teams, including backend engineers, AI engineers, product owners, and UI/UX designers to define and deliver high-quality features.
- Served as Scrum Master, leading a cross-functional team through all Scrum ceremonies (Sprint Planning, Daily Standups, Sprint Reviews, and Retrospectives), ensuring Agile best practices were followed and team members were empowered to achieve sprint goals.
- Ensuring the integration of RESTful APIs and services, enhancing user interfaces, actively participating in debugging, testing, and improving overall application stability.
- Facilitated the resolution of impediments by preparing and presenting targeted presentations to the team, proactively identifying blockers, and driving continuous improvement in team performance and communication.
- Utilizing Git for version control, managing code repositories, feature branching, and resolving merge conflicts to maintain a clean and organized codebase.
- Using tools such as Azure DevOps, Figma, Git, etc. for project management and collaboration.

From 02/2023 to 09/2024 **Aperture UK Consulting (GenX Management partners)**
Front End Developer

- Writing software programs using Angular17, Typescript, Tailwind, SCSS, HTML, Bootstrap, etc.
- Collaborating with backend developers to integrate RESTful APIs and services.
- Led frontend team for a project – in charge of setting technical direction and best practice, delivering deadlines, sprint plannings, dividing tasks, etc.
- Upgrading the project from Angular 14 to Angular 17.
- Translating UI/UX design wireframes into actual code and responsive web apps that work across various devices.
- Gathering and analyzing business requirements from clients to ensure that technical solutions aligned with their needs and expectations.
- Optimizing application performance using various methods.
- Using tools such as Azure DevOps, XD, Figma, Slack, Git, etc. for project management and collaboration.

From 03/2020 to 01/2023 **Codefish/City Relay (Opago)**
Front End Developer

- Creating and maintaining software programs using Angular, Typescript, CSS, HTML, Bootstrap, HeidiSQL.
- Collaborating with backend developers to integrate RESTful APIs.
- Translating UI/UX design wireframes into actual code and responsive web apps that work across various devices.

- Utilizing Git for version control, managing code repositories, feature branching, and resolving merge conflicts to maintain a clean and organized codebase.
- Using tools such as Jira, Figma, Slack, Git, etc. for project management and collaboration.
- Engaging with HeidiSQL DB and Java for backend development tasks.
