Computer and Communication Engineering student with hands-on experience through academic and personal software development projects. Strong in problem solving, and full-stack fundamentals, with a passion for building efficient and user focused solutions. Seeking an entry-level software engineering role where I can grow technically while contributing to real world, impactful projects.

EDUCATION

***Bachelor of Engineering in Computer and Communications (Master Level) Present/2026
Software Engineering***

Antonine University, Lebanon

PROJECTS

- Charity Donation System (C++)
Built a console-based donation management system with user authentication, charity tracking, and transaction records.
- Recipe Management API (Spring Boot, MongoDB)
Developed a RESTful API to manage recipes with full CRUD operations and database integration. Tested endpoints using Postman.
- Supermarket Web Application (HTML, CSS, JavaScript, Node.js, MySQL)
Created a responsive web app with product listings, database integration, and backend routes using Express.js.
- Student Information Management System (Java, JavaFX, Multithreading)
Designed and developed a desktop application to manage student records, courses, and academic data using Java and JavaFX. Implemented object-oriented design principles and used multithreading to handle background operations and improve application responsiveness.

TECHNICAL SKILLS

Programming: Java, JavaFX, C++, Python, SQL, OOP, REST APIs

Web Development: Nodejs, HTML, CSS

RECOGNITIONS/ VOLUNTEER

- Letter of Recognition for my term GPA 2025
- Red Cross 2025
