PROFESSIONAL SUMMARY

Final-semester Computer Science undergraduate with hands-on experience in full-stack web development and AI-powered applications. Proficient in Java, Python, React.js, and PHP/MySQL. Demonstrated ability to design and ship end-to-end systems — from database schema to responsive front-end — alongside a track record of leading operations and digital marketing initiatives. Seeking an internship or junior developer role where I can contribute immediately and grow fast.

PROJECTS

Intelligent MindAid *[In Progress]* — React.js · PHP · MySQL · AI API

- Full-stack mental health platform with secure JWT authentication and a normalised relational database schema.
- Integrated an AI-powered chat module that delivers personalised support resources in real time.
- Architected reusable React component library and RESTful PHP API endpoints consumed by the front-end.

Student Management System — Java · Swing · OOP

- Desktop application demonstrating encapsulation, inheritance, and polymorphism for a full CRUD workflow.
- Implemented file I/O persistence so data survives between sessions; built an intuitive Swing GUI.

Weather App — Python · REST API

- Consumed a live weather REST API, parsed JSON responses, and handled edge-case exceptions gracefully.
- Delivered accurate real-time forecasts through a clean CLI with structured error messaging.

Portfolio Website — HTML5 · CSS3 · JavaScript

- Built a responsive, mobile-first multi-page site with smooth-scroll navigation and client-side form validation.

WORK EXPERIENCE
