PROFSSIONAL SUMMARY

Computer Science graduate passionate about mobile and full-stack development, with hands-on experience building and deploying 2+ cross-platform applications.

PROJECTS

CorelQ – Mobile & Web App | React Native + React + MongoDB + AI Integration

- Developed a cross-platform mobile and web application as a **final project**, integrating 3 AI providers (Groq, Gemini, Hugging Face) to handle token limitations.
- Built backend with MongoDB and deployed web frontend on Netlify, backend on Render.
- Implemented user authentication, real-time data updates, and responsive UI/UX.

Flixfolio – Android App | Java + Firebase

- Developed an Android app allowing users to track movies and TV shows with registration and API integration.
- Designed navigation between activities based on content type (movies vs series).
- Managed full app lifecycle: design, development, testing, and APK deployment.

Salon Menu & Restaurant Menu – Client Projects | React + Firebase

- Built mobile applications for real clients to manage menus and bookings.
- Integrated Firebase for authentication and data storage.
- Delivered functional apps meeting client requirements and user-friendly interface.

EDUCATION

Bachelor of Computer Science

IUL, Lebanon

Jan 2026

SKILLS

- Technical Skills:** Java, JavaScript, Android (Java), React Native, React, Firebase, MongoDB, REST APIs, Git, Netlify, Render, AI Integration.
- Soft Skills:** Problem-solving, Teamwork, Adaptability, Continuous Learning.
