Career Objective

Motivated Computer Science student and aspiring Back-End Developer, seeking internship opportunities to apply my skills in full-stack development and build scalable web applications.

Education

University of Art and Science

Bachelor's Degree in Computer Science — Expected Graduation: January 2026

Technical Skills

Programming Languages: Python, C#, Java, JavaScript, PHP

Frameworks & Technologies: .NET, Laravel (PHP), Flask (Python), AJAX, HTMX

Databases: SQL Server, MySQL, SQLite

Tools & Version Control: Git, GitHub, Visual Studio, VS Code

Projects

POS System (.NET C#)

Developed a point-of-sale system using Clean Architecture and Repository Pattern with API integration and SQL Server (Code First). Version control managed via Git. The system is currently in real use at Caffe 99 in Tayouneh.

Delivery Management System (.NET MVC)

Built a multi-tenancy system to manage delivery operations between stores, companies, drivers, and customers. Implemented using Clean Architecture, Repository Pattern, APIs, AJAX, and HTMX.

Budget Expense Tracker (Python Flask)

Created a web-based tracker allowing users to monitor income and expenses across multiple accounts.

Group To-Do App (PHP Laravel)

Developed a task management system where users can create groups, assign tasks to teammates, and track their status (pending/done).

Achievements

- Scored 100/100 in Python programming course.
- Built a Face Detection AI system that identifies and retrieves saved user data upon recognition.
