

ANTHONY-CHARBEL ROUHANA YOUNES

MIS Student

+961 81 446 742 • anthonycharbelry@gmail.com • Beirut, Lebanon

SUMMARY

Management Information Systems (MIS) student at Lebanese University with practical experience in **software development** and **business analysis**. Skilled in **SQL**, **C#**, and **RESTful APIs**, with the ability to translate **business requirements** into effective **technical solutions**. Demonstrated **leadership** through supervisory and coordination roles, focusing on improving **operations** and **team performance**. Strong interest in building efficient **information systems** and applying **technology** to solve real-world problems.

EXPERIENCE

ZAKA Ambassador

ZAKA | زكا

March 2026 —Present, Hybrid (Beirut)

- Spearheaded campus outreach initiatives to raise awareness and drive participation in professional development programs.
- Coordinated and executed in-person and virtual networking events, enhancing student engagement and strengthening community connections.
- Mentored and onboarded new members, ensuring a structured and supportive integration into the community.
- Leveraged digital communication platforms to promote events and sustain consistent engagement with members.
- Collaborated with cross-functional teams to support strategic growth and expand campus presence.
- Expanded professional networks by connecting students with industry professionals and career development resources.

Education Supervisor

MMKN

February 2026 —Present, Remote (Beirut)

- Supervised tutors, ensuring consistent instructional quality and adherence to performance standards.
- Oversaw scheduling and operations, resolving escalated issues to maintain smooth program flow.
- Acted as liaison between coordinator and students, ensuring clear communication and alignment of objectives.
- Analyzed attendance and performance data to generate actionable insights for process improvements.

Software Development Intern (Full-Stack)

IDS Fintech

February 2026 —April 2026, Remote (Beirut)

- Designed and structured SQL databases to support data organization and ensure data accuracy.
- Assisted in developing and testing RESTful APIs using C# to support backend functionality.
- Applied asynchronous programming concepts to improve application responsiveness.
- Built basic web components following modern web development practices.
- Followed clean coding principles to maintain structured and readable code.
- Applied technical training concepts in practical projects, translating theory into functional solutions.

Education Coordinator

MMKN

October 2025 —Present, Remote (Beirut)

- Strategically coordinated tutoring sessions, optimizing tutor availability to maximize student engagement and success.
- Maintained proactive, clear communication with students to ensure timely updates and seamless scheduling.
- Accurately tracked and report attendance using Excel, providing actionable insights for supervisors.
- Streamlined the tutoring process by anticipating and addressing the needs of both students and tutors, ensuring a consistently smooth learning experience.

Research & Communications Team Member

Life Sculptor

September 2025—Present, Remote (Beirut)

- Conducted in-depth research and data analysis to support event planning, content development, and community initiatives.
- Designed and produced impactful PowerPoint presentations to effectively communicate insights and enhance event professionalism.

- Authored event announcements, articles, and creative content, strengthening organizational communication and outreach for Life Sculptor events.
- Collaborated with Speakers Team to craft and deliver engaging, data-informed presentations that inspired audiences.
- Partnered with Life Coders (Coding & Tech Department) on select projects to integrate technical solutions and digital tools, supporting efficient event execution.

Business Analyst Intern

Centires Co.

May 2024—August 2024, On-Site (Tabarja)

- Supported business development efforts by identifying potential customer opportunities and contributing to the expansion of the client base.
- Assisted in daily sales operations, including order processing, customer follow-ups, and handling inquiries across in-store and phone channels.
- Contributed to internal reporting by organizing sales-related data and supporting performance tracking activities.
- Applied foundational SQL knowledge to understand structured data and support basic data-related tasks within business operations.
- Developed Excel-based charts and simple reports to monitor sales performance and assist in data-driven decision-making.
- Delivered customer support and product guidance in Arabic, English, and French, ensuring effective communication with a diverse client base.

IT Teacher

Private Online Sessions

March 2022—June 2023, Remote (Beirut)

- Delivered personalized online IT lessons to students ranging from Grade 7 to 12th Grade (final year of high school), adapting content to different age groups and learning levels.
- Taught various subjects including computer basics, Microsoft Office tools, internet safety, coding fundamentals (e.g., HTML, CSS, JavaScript), and introduction to programming logic.
- Developed custom lesson plans and interactive exercises to maintain engagement and ensure practical understanding.
- Supported students in completing school assignments and preparing for IT-related exams.
- Fostered a positive and motivating online learning environment, helping students build digital confidence and problem-solving skills.

Social Media Specialist (Freelance)

Self-Employed

April 2021—March 2022, Remote (USA)

- Managed Instagram, Facebook, and TikTok pages for small businesses.
- Created engaging posts, reels, and stories, including video content.
- Edited short-form videos for social media to increase audience engagement.
- Wrote captions tailored to brand tone and target audience.
- Analyzed social media insights to optimize content performance.

PROJECTS

Employee Payroll System

- Console app to manage attendance, calculate salaries, and generate payroll reports.

Smart Habit Tracker

- Tracks daily habits, calculates productivity, and visualizes progress with charts.

PUBLICATIONS

Digital Defenders : Protecting Yourself In A Cyber World , published on Noor Book

Authored an eBook on essential cybersecurity practices for everyday digital safety.
