Summary

Final-year Computer Science student with strong foundation in SQL, databases, and backend concepts. Experienced in building database-driven applications and currently developing skills in Oracle PL/SQL.

Skills

- SQL (JOINS, Aggregations, CRUD)
- Relational Databases
- Oracle PL/SQL (Basic – Procedures, Functions)
- Git / GitHub
- Python, SQL, Java, Javascript, HTML, CSS, Backend Basics in: Node.js, APIs, Express.js

Relevant Experience

Web Development Intern – Coding & Create | August 2025 - September 2025

- Built a news website using HTML, CSS, JavaScript, SQL, PHP
- Worked on frontend structure and UI components
- Collaborated on basic web development tasks

Projects

Student Management System

- Designed relational database schema (students, ID, courses, enrollments)
- Wrote SQL queries using JOINS and aggregations
- Implemented CRUD operations for managing data

PL/SQL Database Scripts (In Progress)

- Developed stored procedures and functions
- Applied database logic for data manipulation and automation

To-Do List Application (Python)

- Built CLI-based task manager using Python
- Implemented task creation, deletion, and tracking logic

News Website

- Developed a fully functional website, working in a team, allowing users to browse and filter news articles by category
- Implemented a responsive design for compatibility across multiple devices and browsers
- Built a backend using PHP and SQL to manage articles and enable dynamic content updates

Languages

- Fluent in English and Arabic
