Full-stack developer with experience developing web solutions from frontend to backend. Skilled in **JavaScript, APIs, and databases with a strong focus on clean architecture**, and usability. Driven to **turn ideas into applications that deliver real user value**.

Technical Skills

- JavaScript • TypeScript • React • Java • SQL • Git • Node.js • Next.js • PHP • Laravel • PostgreSQL • HTML5
- Tailwind CSS • CSS3 • REST APIs • Postman • Authentication & Authorization

Professional Experience

Full Stack Developer Intern – Techryt, Remote (April 2026 – Present)

- Contributed to a **real-world production system**, working closely with seniors and following best practices.
- Leveraged modern web technologies to build **scalable** features and handle complex data workflows.
- Contributed to developing, and testing features, translating requirements into clean maintainable code.

Full Stack Developer & Youth Program Support – ALJANA NGO (Nov 2025 – Present)

- Built QR-based workshop attendance system **automating** session tracking and participant data.
- Developed automated Excel reporting system that **generates real-time dashboards**.
- Visualized results that used by **10 supervisors across partners for faster decision-making**.

Full Stack Developer Intern – IDS, Beirut (May 2025 – July 2025)

- **Developed RESTful APIs** with authentication and role-based access for admin and user workflows.
- Collaborated on system design architecture with seniors, **gaining** exposure to production-level practices.
- Participated in API testing and code reviews, **ensuring code quality** and team standards.

Full Stack Developer – Freelance (May 2025 – Present)

- Developed web applications for small businesses, **including e-commerce platforms and portfolio sites**.
- Enabled clients to **showcase** products and manage online interactions through custom-built interfaces.
- Helped businesses **reduce** manual coordination and **strengthen** their digital presence.

Selected Projects

AI-Integrated Car Sales Platform:

- Project **referenced** by university students as a case study for AI integration in web applications.
- Built AI sentiment analysis to **analyze** customer reviews, achieving **96% accuracy on 500+ comments**.
- Integrated an **AI chatbot using OpenAI API** to answer queries about vehicles and inventory.
- Designed a detailed sales dashboard with visualizations to **track customer activities**.

Smart Room Meeting Management System:

- Developed a room booking and meeting platform with **automated** Minutes of Meeting generation.
- **Reduced** scheduling conflicts by enabling teams to manage meeting logistics across the organization.
- Implemented **role-based access** for administrators to manage rooms, attendees, and booking activity.
- Built **RESTful APIs** using Laravel & MySQL, integrated with a responsive **React** + Tailwind interface.

Education

B.Sc. in Computer Science — Rafik Hariri University (RHU) (September 2022 – April 2025)
