

Ali Al-Hadi Khalil

Full-stack developer

Beirut, Lebanon | +961 76 768 456 | alialhadikhalil2002@gmail.com

Summary

Full-stack developer and recent B.S. Computer Science graduate with well-rounded backend knowledge and hands-on experience building Laravel applications, including RESTful APIs, authentication/authorization, and database-driven features.

Frontend experience delivering Flutter/Dart mobile apps and Laravel Blade views for web. Comfortable integrating UI with APIs end-to-end, and eager to contribute as a Laravel + Flutter developer while continuing to grow through real-world projects.

Experience

Marketplace e-commerce website University project	Oct 2024 - Jan 2025
- Developed a marketplace website using Laravel as a backend framework, aligned with “OWASP TOP 10” web app sec risks, including 3 roles: admin, vendor, user - Implemented industry-standard security controls, including bcrypt password hashing, CSRF protection, input validation and encoding for JavaScript reflection endpoints, parameterized queries for SQL statements, and business-logic testing to mitigate vulnerabilities such as IDOR, XXE, and SSRF ...	
Homemade food store (Mobile app) University project	Oct-present 2025
- Developed a full-stack mobile application using Flutter (Dart) for the frontend and Laravel for the backend, implementing a RESTful API to manage data between client and server. - Implemented JWT authentication with role-based access control (Admin, Vendor, User, Guest) HTTPS, and input validation to protect API endpoints from unauthorized access and common web vulnerabilities (OWASP TOP 10 web app and mobile security) - Applied best practices for data protection, session management, and secure mobile storage, enhancing overall application cybersecurity.	

Education

Bachelor of Science in computer Science MU university	2022-2026
Career path cybersecurity course(8 Fields/Modules included) Semicolon Security	2025

Skills

Programming Languages - Proficient in multiple languages with solid problem-solving and development experience : C++ , Java , JavaScript , HTML/CSS, Dart, PHP, SQL Frameworks & Tools - Experienced in modern frameworks and tools for both frontend and backend development : Laravel and Flutter (gained), RESTful API development (learning and implementing), Postman (API testing) Cybersecurity & Networking Tools - Skilled in using essential tools for network scanning, vulnerability testing, and analysis: Nmap, Metasploit, Subfinder, Gobuster, Wireshark Team & Communication - Strong interpersonal skills with proven teamwork and communication abilities: Strong teamwork, excellent communication skills
