Profile

Backend-focused Computer Science student specializing in Laravel and MySQL, with hands-on experience building secure REST APIs, role-based systems, and production-ready database designs. Volunteer EMT Assistant at the Emergency and Relief Corps in Lebanon, bringing strong responsibility, reliability, and composure under pressure.

Professional Experience

Backend Development Intern, YubeeAi Aug 2025 – Nov 2025 | Remote

- Migrated several **AJAX-driven** pages to **Laravel Livewire**, reducing JavaScript complexity and improving maintainability
- Built **full-stack Livewire components** with dedicated controllers, routes, and Blade views for core clinic management features
- Collaborated with the team on backend **business logic** and optimized **MySQL queries** for data-intensive clinic workflows

Backend Development Intern, XpertBot Dec 2024 – Mar 2025 | Remote

- Designed and built **RESTful APIs** using **Laravel Sanctum**, handling **authentication, token management**, and secure endpoint **authorization**
- Implemented **role-based access control (RBAC)** for multi-user systems, separating permissions across admin, staff, and client roles
- Modeled **relational MySQL schemas** with proper **indexing** and **Eloquent ORM relationships**, improving query performance on high-read endpoints
- Participated in code reviews and maintained clean version history using **Git branching strategies**

Projects

HotelGo 🌐, *Laravel – MySQL – Blade – TailwindCSS – Git – Jira* Nov 2025 – Dec 2025

- Built room management features using **Laravel controllers** — implementing availability logic, room listings, and seamless data flow between views and the database
- Designed **MySQL migrations** and **Eloquent relationships** to support reservations, room types, and occupancy tracking
- **Integrated Stripe payment gateway** — implemented secure checkout flows, handled webhook events, and managed transaction lifecycle from booking confirmation to payment processing
- Applied **server-side rendering (SSR)** via **Blade** templates to deliver fast, dynamic content without front-end overhead
- Led **Git** workflow for the team: defined branching conventions, managed pull requests, and ensured clean version control throughout the project
- Managed **Jira board** and **Agile** sprint cycles — organized tasks, tracked progress, and coordinated feature handoffs between team members

Technical Skills

- **Backend:** PHP (Laravel), MySQL, REST APIs, Laravel Sanctum, Livewire, Role-Based Access Control (RBAC), Web Sockets, OOP, Design Patterns
- **Frontend:** HTML, CSS, JavaScript, TailwindCSS, Blade
- **Tools:** Git, GitHub, Postman, Docker, Jira
- **CS Fundamentals:** Data Structures & Algorithms, OOP, Design Patterns, ER Modeling, Computer Networks, SDLC

Soft Skills

- | | | |
|--------------------------|-----------------------|----------------------------------|
| • Team Collaboration | • Problem Solving | • Technical Communication |
| • Leadership & Mentoring | • Agile Workflow | • Ability to Work Under Pressure |
| • Adaptability | • Continuous Learning | • Debugging Mindset |

Education

Lebanese University, Computer Science 2024 – May 2026 | Beirut, Lebanon
