Beirut, Lebanon • +96181344139 • sireen.badawi01@outlook.com •
<http://linkedin.com/in/sireen-badawi-413712258>

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, TypeScript, SQL, Bash
 - **Frontend:** React, TypeScript, Vite, Tailwind CSS, Mantine, TanStack Query, React Router
 - **Backend & Data:** Node.js, Supabase, PostgreSQL, Deno, Supabase Edge Functions, REST APIs, Webhooks, MongoDB
 - **AI & Automation:** OpenAI API, Anthropic API, LLM Integration, Prompt Engineering, Workflow Automation, PDF/Document Processing, AI-Assisted Development
 - **Integrations:** Stripe, PayPal, OAuth, Gmail/Zoho Workflows, Meta Pixel, n8n
 - **Tools:** Git, Linux/Bash, Playwright, Vitest, Recharts, Debugging, Logging, Authentication/JWT
 - **Soft Skills:** Time Management, Problem Solving
-

WORK EXPERIENCE

Full Stack AI Developer, C. Monkey Tribe

Nov 2025 - Present

- Built and maintained production web applications across internal operations, client portals, hospitality systems, e-commerce flows, and AI-enabled business products.
- Developed full-stack features using React, TypeScript, Vite, Supabase, PostgreSQL, Node.js, and serverless functions.
- Implemented AI-powered workflows for content generation, assistant behavior, CV/resume processing, PDF extraction, and knowledge-driven automation.
- Created dashboards and operational tools for analytics, approvals, payroll, bookings, reporting, and workflow visibility.
- Integrated external services including Stripe, PayPal, Gmail/Zoho flows, Meta tracking, OAuth, webhooks, and scheduled automations.
- Improved production reliability through debugging, validation, route protection, auth fixes, security hardening, and business-logic cleanup.

Java Backend Intern, FOO

June 2024 - August 2024

- Developed RESTful APIs and CRUD operations using Java and JPA.
- Applied validation, caching, asynchronous processing, and error handling.
- Tested and documented APIs to support reliable integrations.
- Implemented log storage with MongoDB and maintained version control using Git.

Lab Assistant (Python) — Lebanese American University

Sep 2023 - Dec 2023

- Assisted instructors during Python programming labs and supported smooth lab operations.
 - Helped students debug assignments and understand programming concepts.
 - Provided basic technical support during lab sessions.
-

PROJECTS

VR Speech Coach (2025)

- Designed and developed a VR application that provides real-time public speaking feedback.
 - Used machine learning models for body and vocal analysis.
 - Integrated OpenAI Whisper and spaCy for grammar and repetition detection.
 - Awarded Best Capstone Project 2025 for innovation and real-world impact.
-

EDUCATION

Lebanese American University - Beirut, Lebanon

2022 - 2025

Bachelor of Computer Science

ADDITIONAL INFORMATION

- **Languages:** Arabic (Native), English
- **Workshops:** AWS Cloud Workshop (2023), DevFest (2023), Cybersecurity Workshop – Semicolon Academy (2023), AI Career Fair (2025)
