Université Saint Joseph (USJ) — Licence en Informatique Appliquée aux Entreprises

2024 – Present (Anticipated Graduation: June 2027)

Lycée Abdel Kader — Baccalauréat Français

Graduated: 2024

Languages

- English | French | Arabic

Work Experience

Backend Developer & Co-Founder – ElevateWeb

May 2025 – Present

- Co-founded a web development agency delivering full-stack web solutions for clients.
- Led backend development, database design, and server-side logic using PHP and MySQL.
- Managed deployment, hosting, and domain configuration via Hostinger and Namecheap.

Intern – CCSS

July 2025 – August 2025

- Developed a full-stack internal web application for an insurance company using .NET Framework, C#, SQL Server, HTML, Tailwind CSS, and JavaScript.
- Designed and optimized relational databases, queries, and stored procedures.
- Collaborated with another intern to design and implement features.

Extracurricular Activities – Summer Camps

Dent de Lait & Enfant du Soleil | 2023 – 2025

- Led and supervised teams of monitors during daily activities.
- Maintained a safe, organized, and engaging environment for children.

Projects

Revyv – Clinic & Shop Website | revyvofficial.com · buyrevyv.com

- Built and deployed the full backend for a dual-domain wellness brand (clinic landing page + e-commerce shop) using PHP and MySQL.
- Integrated Whish (Lebanese payment gateway) with a complete checkout flow supporting online payment, Cash on Delivery, and in-store pickup.
- Engineered a multi-tier discount system with influencer referral codes (first-order discounts, permanent user assignment) and shop promo codes with guest/member access.
- Implemented secure user authentication (remember-me, forgot-password, IP based rate-limited login) and an admin dashboard for orders, products, promo codes, and influencer tracking.
- Automated emails notifications with PDF invoice generation and integrated Meta Pixel + Conversions API (CAPI) for marketing analytics.

The Pokédén - Pokémon E-Commerce Platform | thepokeden.ae

- Built and deployed the full backend for a live Pokémon TCG shop based in the UAE, serving customers internationally.
- Integrated Ziina (UAE payment gateway) and Jeebly (courier API) with a custom webhook to sync real-time delivery status back to the database.
- Designed a tiered loyalty system with per-AED point earning, tier-based bonuses, and checkout redemption.
- Built a trade request system with image uploads, condition grading, and admin review — and a comprehensive admin dashboard with real-time analytics (revenue, profit margin, sales by category/day, customer LTV, inventory alerts).
- Secured the platform with CSRF protection, IP-based rate limiting, session timeouts, server-side re-verification on every admin request, and password hashing.
