

Nizar Afionni

Full Stack Developer · Beirut, Lebanon · +961 81 419 450 · nizarafionni@outlook.com · [LinkedIn](#) · [GitHub](#)

PROFILE

Full Stack Developer specialising in Angular 17–19 with production experience across complex insurance-finance platforms. Skilled in Signals, RxJS, OnPush CD, Node.js, .NET, and Supabase. Works in Scrum teams, manages Azure DevOps CI/CD pipelines, and ships faster using AI tooling daily.

EXPERIENCE

Full Stack Developer — Aperture Tech Solutions · Jun 2025 – Present · Beirut · Hybrid

- Improved accounting module reliability by owning end-to-end feature development — complex form logic, real-time state with Angular Signals, and dynamic report generation using Report.js
- Accelerated UI delivery by designing reusable Angular components adopted across multiple modules, reducing duplication and enforcing consistent UX patterns
- Strengthened backend coverage by adding .NET endpoints, diagnosing full-stack bugs, and authoring Playwright E2E test suites covering critical user flows
- Maintained Azure DevOps CI/CD pipelines and proposed UI/UX improvements that enhanced usability across the platform

Software Developer Intern — Intelligile · Summer 2024 · Tripoli, Lebanon

- Produced BRDs, use case diagrams, and functional specs bridging business requirements and engineering — reducing ambiguity at the start of development cycles

Web Developer Intern — Xpertbot · Oct 2024 – Apr 2025 · Remote

- Built Laravel backend for a tutor-student platform — course management, roles, dynamic enrollment, PDF certificates, and Filament admin dashboard

PROJECTS

Daymeh — Lebanon's First Food Rescue Platform · [daymehleb.com](#) · 2025

React · TypeScript · Node.js · Supabase (Postgres + RLS + pgvector) · Wish Pay API · iOS & Android

- Reduced food waste by building a full-stack platform connecting Lebanese restaurants with customers via discounted end-of-day meals — live with 1,600+ web users and 400+ app downloads
- Enabled AI-powered recommendations using pgvector, embedding user order history to surface relevant meals at checkout

StudyBuddy — AI Learning Platform · [github.com/Narzar27](#) · 2024

- Udemy-inspired e-learning platform with integrated AI chatbot for personalised study roadmaps — built as senior project

Bath & Beyond — Freelance Site · [bathandbeyond.me](#) · May 2025

- Responsive Next.js company site with branded UI, product showcase, and inquiry form — deployed for Dubai client

SKILLS

Frontend	Angular 17–19 (Signals, RxJS, Elf, OnPush, Lazy Loading), React, Next.js, Tailwind, PrimeNG, AG Grid
Backend	Node.js, Express, REST APIs, Supabase (Postgres + RLS + pgvector), MySQL, Laravel, .NET (basic)
DevOps & Tools	Azure DevOps CI/CD, Git, Docker, Playwright, Postman, Vercel, Claude Code
Languages	Arabic (Native) · English (Fluent) · French (Basic)

EDUCATION

B.Sc. Computer Science — Beirut Arab University · Sep 2022 – May 2025
