Core Skills: Full-Stack Development, RBAC, CRUD, MVC, Database Design, Secure File Upload Systems, Requirements Gathering

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer & Project Coordinator

U.S.-Based Insurance CRM Project | Jan 2026 – Present

- Coordinate development for a paid CRM platform within a 3-person team.
- Work directly with the client to gather requirements, refine priorities, and align implementation.
- Develop backend functionality using PHP, Yii2, and MySQL, including authentication, authorization, and customer workflows.
- Build responsive frontend interfaces using HTML, CSS, Bootstrap, and JavaScript.
- Implement secure file upload and document-sharing functionality.
- Participate in database schema and architecture planning.
- Use Git/GitHub for collaborative development.

PROJECTS

Geometric Calculations Web Application (Academic Project)

- Developed a browser-based application for area, perimeter, and volume calculations.
- Built using XHTML, CSS, and JavaScript with interactive input handling.
