Education

2024-Present

Lebanese University
Undergraduate Computer Science

Skills

- HTML - CSS - JavaScript
- Java
- SQL
- Team work and collaboration
- Attention to details and quality
- Self-improvement mindset

About Me

Motivated computer science undergraduate with a foundation in web development through university coursework. Eager to contribute to real world projects and further develop programming skills in a professional environment.

Projects

Online Book Library (Team Project | Client-side Web Application)

- Customized a free website template to develop a functional homepage with a searchable navbar and genre navigation.
- Integrated dynamic sections for books and authors, allowing users to browse by category.
- Designed and implemented the book detail view entirely from scratch, aligned with the template's style but featuring a unique layout.
- Enabled interactive features: clickable books, view full details (cover, title, description), like, rate, add to favorites, mark as currently reading, and download.
- The completed project was published to a public GitHub repository.
