Profile

Skilled Software Developer with expertise in building web applications across the full software development lifecycle. Experienced in optimizing business processes while combining strong technical abilities with excellent leadership and client communication skills. Passionate about driving innovation and delivering impactful solutions in dynamic environments.

Work Experience

Midware Data Systems, ITG Holding – Software Engineer

Jan 2023 – Present

- Developed a reusable full stack Software solutions and business portal using .NET Core, ReactJS, REST APIs, and clean architecture principles, enabling seamless integration between multiple modules and services.
- Handle client meetings for app requirements and on site support to discuss solution architecture and align on technical and business needs.
- Launched a FinTech platform focused on financial service payments integration, onboarding vendors and agents while streamlining payment processing, user wallet management, and overall operational efficiency through a centralized portal integrated via REST APIs.
- Facilitated agile project workflows, managing code merging and resolving Git conflicts, database management and migrations, deploying applications on IIS.
- Customized Microsoft D365 Business Central and Finance & Operations ERP solutions using X++ and AL, translating client requirements into optimized functionalities.
- Mentored interns and new joiners, providing task oversight, and code reviews. Designed scalable solution architecture and led development of a Collector mobile app to help drivers calculate and manage customer collection targets. Delivered successfully by the end of the internship period.

Soft Flow Group, Beirut, LB – Software Engineer

Oct 2021 – Dec 2022

- Integrated and developed business solutions across MS SharePoint, Dynamics 365 CRM (Sales Hub), and Power Automate, leveraging DFFS and JavaScript.
- Developed and implemented a full lifecycle HRMS system in .NET (C#), encompassing payroll, HR management, asset tracking, and performance metrics.
- Developed and optimize SQL queries, stored procedures, and functions to enhance data retrieval and manipulation.

Education

AUST University, Beirut, LB – BSc in Computer Science

Oct 2019 – Feb 2022

- GPA: 3.2
