Work Experience

Junior IT Support (Part-Time) | Baraka Mills | August 2025 – March 2026

- Hardware, software, and basic network troubleshooting
- Assist users with operating systems, applications, and account access
- Log, tracked, and resolved support tickets in a timely manner
- Support users with system access, basic networking, and connectivity issues
- Work under supervision of senior IT staff to resolve escalated issues

Junior ERP | Technical Trainee | Coders | October 2024 – February 2025

- Gained hands-on exposure to Microsoft Dynamics 365 Business Central in a business environment
- Learned the fundamentals of AL (Application Language) used for Business Central customization
- Worked with MySQL databases for basic data querying and understanding ERP data structures
- Assisted in understanding ERP workflows, data handling, and system integration concepts
- Developed foundational knowledge of how business systems support operational processes

Infrastructure Intern | UNRWA Lebanon Field Office | May 2024 - July 2024

- Configured and deployed Cisco Access Points and network printers to ensure reliable connectivity for office staff.
- Managed physical infrastructure, including Ethernet cabling, port mapping, and installation of routers and switches.
- Assisted senior engineers with server room maintenance and real-time troubleshooting of hardware issues.
- Monitored network performance and documented port configurations to support infrastructure upgrades.

Projects

Freelance Frontend Project | [BEWE] | 2025

- Designed and deployed a responsive web interface using React and AI-assisted development tools.
- Managed the deployment lifecycle, ensuring the final site was fully functional and optimized for user access.

Sport Field Booking System (Senior Project) | PHP & MySQL | 2024

- Architected a dynamic web-based platform for real-time sports field reservations using a full-stack approach.
- Developed the backend logic in PHP and managed data persistence using a MySQL database.
- Designed the frontend interface with HTML, CSS, and JavaScript to ensure a seamless user experience.

Additional Technical Projects

- Hotel Booking System: Designed an ER model-based database to manage complex reservations and customer data integrity.
- Quiz Management System: Built an automated platform for student assessments, focusing on logic-based grading and data handling.

Technical Skills

- Networking & Infrastructure: Cisco Access Points, Routers & Switches, Ethernet Cabling & Port Mapping, Network Monitoring.
- IT Support & Systems: Windows/macOS Troubleshooting, Microsoft Dynamics 365 Business Central, MySQL Databases, Ticketing Systems.
- Web Development: React, PHP, JavaScript, HTML/CSS, Tailwind CSS.
- Tools: AI-Assisted Development, Microsoft Office 365.

Certifications

- Cisco CCNA 1 & 2: Networking Essentials.
- Industrial Automation Training (Siemens S7-1200 PLC): MatrixEA Academy – Completed Basic, Professional, and Advanced Levels.

Education

Lebanese International University (LIU) | September 2019 – June 2024

- Bachelor's Degree in Communication Engineering
