ABOUT ME

I am a motivated Computer Science student with practical experience in backend development using Laravel. I excel at building scalable web applications, designing efficient database structures. I am eager to apply my skills, learn new technologies, and contribute to complex software projects in a professional setting.

EXPERIENCE

Xpert-Bot|2024-2025

Backend Intern

- Built and maintained Laravel applications using MVC architecture to deliver scalable and maintainable features.
- Developed RESTful APIs, handled JSON responses, and tested endpoints using Postman.
- Worked with Eloquent ORM to manage database operations, relationships, and complex queries.
- Strengthened Laravel skills through self-learning (Laracasts), focusing on API development, middleware, validation, and best practices.
- Collaborated with the backend team using Git workflows, code reviews, and industry standards.

PROJECTS

Guidely|April 2026-March 2026

Backend Developer

Contributed to the development of an educational platform in collaboration with a Next.js frontend team, building a scalable and well-structured backend system.

Technical Implementation

- Designed and implemented RESTful APIs using Laravel MVC architecture with a clean separation of Services and Resources.
- Used Traits to improve code reusability and maintain a modular backend structure.
- Wrote automated tests using Pest to ensure application stability and reliability.
- Worked with PostgreSQL and Neon for database management and collaboration.
- Deployed and managed backend services using Railway.
- Collaborated using GitHub for version control and Jira for agile task tracking.

HotelGo|Nov 2025-Dec 2025

Full-Stack Developer

Developed a full-stack hotel management system with role-based access control, secure transactions, and real-time business workflows.

Technical Implementation

- Your paraBuilt an MVC-based Laravel application using MySQL, implementing migrations, seeders, and Eloquent relationships for structured data management.
- Developed a complete booking and payment system supporting deposits, full payments, discounts, loyalty points, and transaction tracking.
- Implemented layered security using Laravel Breeze, custom middleware, and Form Requests to enforce authentication, verification, and authorization.
- Created dynamic search functionality using Query Builder and built analytics dashboards with aggregated business metrics.
- Integrated automated email workflows and developed a responsive UI using Blade with reusable components.
- Managed development using Git, Jira, and Postman for version control, task tracking, and API testing.

SKILLS

- **Programming Languages:** C\C++, Java, PHP, JavaScript.
- **Programming Concepts:** Object-Oriented Programming (OOP), Design Patterns, Clean Code Principles, Multithreading&Concurrency.
- **Backend:** Laravel, RESTful APIs, Laravel Sanctum, Role-Based Access Control (RBAC).
- **Database:** MySQL, PostgreSQL, Neon, Eloquent ORM (Migrations, Seeders, Relationships).
- **Tools & DevOps:** Git, GitHub, Jira, Railway.
- **Frontend:** Html, CSS, Tailwind CSS, Blade Templates.
- **Soft Skills:** Team Collaboration, Problem Solving, Communication, Time Management, Adaptability, Attention to Detail.

EDUCATION

Lebanese University | 2024- 2026

Bachelor's degree in Computer Science
