OBJECTIVE

Computer Science student with a solid foundation in software development and database systems. I have hands-on experience developing web-based applications using HTML, CSS, JavaScript, PHP, SQL, and Node.js, React, with a strong focus on backend logic and system design. My academic projects include building an eCommerce platform featuring authentication, product management, shopping cart functionality, and database integration.

I am particularly interested in software engineering, backend development, and applied AI, and I am continuously expanding my technical skill set through coursework and project-based learning.

Currently Working on a React project using Next.js framework.

Currently seeking internship opportunities where I can apply my skills, contribute to real-world projects, and grow as a software developer in a professional environment.

EDUCATION

computer science graduate, *Lebanese International University (LIU)* 01/2026
