SUMMARY

Full-stack software developer with hands-on experience building and delivering enterprise level solutions. Strong in designing maintainable, scalable solutions aligned with business needs, and comfortable contributing across the full development lifecycle. Focused on creating reliable systems that perform well in production and support real operational requirements.

EXPERIENCE

Software Developer - GreenEra

Jan 2026 – June 2026

Contributed to the development of a school management platform covering academic records, grading, content management, CRM workflows, employee and user administration, and inventory. Built as a commercial multi-tenant SaaS product, the platform is designed for deployment across multiple schools with tenant-level data isolation and configurability.

- Designed multi-portal access with role-based authorization.
- Contributed across data modeling, API design, and frontend integration in line with the product roadmap.
- Built the CRM portal supporting teacher content management, approval workflows, parent-school communication, and engagement tracking.
- Implemented modules for grading, academic records, inventory management, and employee administration.
- Tech stack: C#, ASP.NET Core, Entity Framework Core, ASP.NET Identity, Blazor, SQL Server.

PROJECTS

ReDressly — Secondhand Fashion Marketplace · MENA

Designed and built a secondhand fashion marketplace for the MENA region with product discovery, category filtering, seller listings, direct WhatsApp communication, wishlist management, notifications, and user profile management. Delivered a polished MVP supported by a scalable REST API architecture.

- Received special recognition at the YallaLoubnan Competition organized by Lovable.
- Presented to the Lebanese Ministry of AI (MITAI) as a potential initiative for broader implementation.

CyberSafe Kids — Online Safety Education Platform

Built an interactive educational platform to teach children how to stay safe online, covering digital privacy, cyberbullying, and responsible internet use through age-appropriate content.

- Awarded 1st place at the Spot Cast Platform competition.

Driving License Management System

- Built a desktop application managing the full driving license lifecycle, including applications, test stages, issuance, and detention and release tracking.

SKILLS

Languages C#, SQL, T-SQL

Frameworks .NET Framework, ASP.NET Core, Entity Framework Core, ASP.NET Identity, ADO.NET, Angular

APIs & Services RESTful APIs, Windows Services

Databases SQL Server, Database Design, T-SQL

Architecture & Concepts Clean Architecture, OOP, Data Structures & Algorithms, SaaS Design

Tools Visual Studio, Git, GitHub

EDUCATION

Bachelor's in Computer Science

Jinan University

Tripoli, Lebanon

Diploma — Administrative IT

Institut Technique Orthodox

Halba, Lebanon

CERTIFICATIONS & TRAINING

ProgrammingAdvices.com — 25-Course Roadmap

- Stage 1: CS fundamentals, algorithms, problem solving, data structures, OOP — implemented in C++.
- Stage 2: .NET Framework, SQL/T-SQL, ADO.NET, Windows Services, RESTful APIs — with real-world project work.
