HTML / CSS / JavaScript [Intermediate]

VBA (Excel Automation) [Intermediate]

TOOLS

Tableau • Power BI • MySQL Workbench • VS Code • GitHub • Anaconda • n8n (AI Automation) • Excel • Visual Studio

WORK EXPERIENCE

Data Analyst – GlobeMed (Order of Engineers & Architects), Lebanon

March 2026 – May 2026 | 2-Month Contract

- Analyzed 6,000+ reimbursement requests, validating documentation and identifying discrepancies to improve data accuracy
- Tracked and reported claims data using internal databases; flagged anomalies to support operational decision-making
- Provided data-driven support to over 10,000 engineers on insurance coverage and claims queries
- Ensured compliance with data confidentiality standards for sensitive medical and financial records

Data & Operations Analyst – Seven To Twelve, Lebanon

June 2023 – September 2024

- Maintained and analyzed product, inventory, and sales data across internal systems
- Tracked daily sales and inventory metrics using Excel, producing regular performance reports
- Performed data cleaning and validation, reducing record discrepancies by 25%
