PROFESSIONAL SUMMARY

Technical Project Manager with a Bachelor's degree in Computer Science and hands-on experience in leading cross-functional teams using Agile and Scrum methodologies. Skilled in delivering scalable AI systems using LLM, NLP, and Machine Learning, aligning technical execution with business goals. Recognized for clear communication, foresight, and elevating project outcomes through leadership.

WORK EXPERIENCE

Technical Project Manager at UniEquip, Larnaca: October 2025 – Present

- Owned end-to-end delivery of 12+ enterprise technology initiatives across engineering, commercial, and C-suite stakeholders achieving 95% on-time completion against OKR-driven strategic objectives.
- Instituted Agile/Scrum frameworks and Jira workflows across 6 concurrent workstreams, boosting sprint predictability by 35%, cutting delivery delays by 25%, and establishing velocity baselines for capacity planning.
- Engineered Power Automate workflows that cut administrative overhead by 40% and delivered daily Power BI dashboards, reducing executive reporting cycles from weekly to daily and saving around 9 hours/week of manual effort.

Full-Time AI Engineer at BlueWallet, Downtown: June 2025 – October 2025

- Spearheaded delivery of an AI-powered lead generation bot coordinating engineering and sales stakeholders, integrating with HubSpot CRM, and generating 300 leads/month.
- Deployed AI automation chatbots across diverse platforms for 15 international companies, reducing manual workflow overhead by 70% and cutting average response time by 80%.

EDUCATION

Bachelor's degree in Computer Science – Lebanese American University, Beirut, Lebanon – 2024

Lebanese Baccalaureate in Life Science – Saint Mary's Orthodox College, Beirut, Lebanon – 2020

PROJECTS

BotsAndBots – AI Automation Marketing Platform: October 2025 – November 2025

- Orchestrated a high-impact website to market AI automation bots to global clients, generating 6+ qualified sales within the first month.

Heartbeat Sounds – Health App measures Heartbeats: November 2023 – May 2024

- Assembled a mobile app featuring heartbeat tracking, health feedback, hospital locator, and an AI chatbot; achieved a 4.5-star App Store rating with 50+ downloads.
