WORK EXPERIENCE

BrainRocket

Georgia, Remote

Senior Frontend Developer Dec 2025 - Present

- Spearheaded the architectural design of a scalable widget system using Shadow DOM, ensuring 100% style encapsulation and seamless integration into third-party environments.
- Acted as a Key Developer with full accountability for critical sprints, making strategic technical decisions that accelerated feature delivery by 25%.
- Engineered a high-performance build pipeline with Rspack, achieving a 40% reduction in cold start and incremental build times compared to previous Webpack configurations.
- Optimized global state management by transitioning to Zustand, which simplified the codebase and led to a 15% improvement in runtime performance across complex component trees.
- Led the full-cycle integration of complex SDKs, designing robust interfaces that reduced integration time for partner systems by 30%.
- Developed and embedded highly responsive widgets into external ecosystems, leveraging Shadow DOM to guarantee zero-conflict deployments and a consistent UI/UX.
- Orchestrated mission-critical project milestones, maintaining a 100% success rate in sprint delivery while mentoring junior developers on advanced architecture patterns.

Valletta Software Development LTD

Tbilisi, Georgia

Senior Front-End Developer Jan 2024 - Present

- Led the development and maintenance of a complex management system with components such as dynamic trees and flexible filters.
- Used JIRA for meticulous tracking, reporting, and auditing of application issues, ensuring effective resolution of emerging challenges.
- Created an engaging user interface using HTML, CSS, Bootstrap, React, React Native, Next.js, and JavaScript, resulting in a 30% increase in user engagement.
- Championed test automation using the Jest framework, reducing manual testing efforts by 50%.
- Actively participated in weekly team meetings, providing detailed project progress reports and fostering effective communication and collaboration.
- Leveraged senior developer expertise to cultivate a culture of excellence, where feedback led to improvements, enhancing efficiency and quality of work.
- Developed highly responsive components using React and Redux, which reduced page load times by 30% and increased user engagement by 20%.

EPAM ANYWHERE Antalya, Türkiye

SOFTWARE DEVELOPMENT ENGINEER May 2021 - Dec 2023

- Developed and maintained a management system with complex components such as trees and filters.
- Designed and implemented a responsive user interface using HTML, CSS, Bootstrap, React, React Native, Next.js, and JavaScript, leading to a 30% increase in user engagement due to improved functionality and usability.
- Implemented automated testing using the Jest framework, reducing manual testing efforts by 50%, thus enhancing accuracy and speed of bug detection.
- Developed and implemented innovative features for authentication and pagination, resulting in a 20% increase in user engagement through improved performance and quick access to content.
- Participated in weekly team meetings, providing detailed project updates, which improved communication and collaboration among team members, reducing coordination time by 15%.
- Received valuable feedback on completed work, leading to a 30% increase in the efficiency and quality of delivered products by adopting a more flexible approach to development and improving client interactions.
- Implemented highly adaptive components using React and Redux, which reduced page load times by 37% and increased user engagement by 23% through enhanced speed and responsiveness of the interface.

WORK EXPERIENCE

DevhouseStavropol

Front-End Developer Jan 2019 - May 2021

- Implemented web and mobile interfaces for theaters and startups in the USA and Norway.
- Collaborated with cross-functional teams to analyze and improve existing application logic, resulting in a 20% reduction in system errors.
- Automated web scrapers to run during off-peak hours, optimizing data updates for clients and reducing server load by 30%.
- Developed and implemented a management system based on micro-frontend architecture called Data-Connector, which increased team productivity by 20%.
- Optimized the library for integrating Google and Amplitude Analytics, improving data performance and accuracy by 75%.
- Streamlined front-end development processes, reducing the number of bugs by 60% and decreasing overall project timelines by 40%.
- Developed and presented results and solutions to audiences, including senior executives and stakeholders.
- Additionally, worked on building startups by implementing innovative approaches to enhance their performance. This led to a 35% improvement in development processes and increased operational efficiency, accelerating their product time-to-market by 25%.

Freelance.ru

Stavropol

Front-End Web Developer 2015 - 2019

- Developed visually appealing layouts and navigation for the BioShop project.
- Initiated and led a new code structure, reducing the time for reviewing Pull Requests by 50% (100% reduction in time).
- Contributed over 50,000 lines of code to the existing codebase via Git.
- Developed front-end functionality, including forms, validation, and error handling using HTML, CSS, JavaScript, and related technologies.
- Ensured full responsiveness and mobile-friendliness of the website through extensive testing, increasing user convenience by 30%.
- Implemented best practices and development methodologies, leading to a 25% improvement in project performance and enhanced code quality.
- Actively participated in the creation and optimization of interfaces, resulting in a 20% increase in user satisfaction and a 15% reduction in development time.
- Optimized development processes, which reduced code review time by 50% and increased overall team efficiency by 20%.
- Extensive experience working with large codebases and modern knowledge of front-end technologies highlight my capabilities as a senior specialist in this field, improving project performance and quality by 30%.

EDUCATION

North-Caucasus Federal UniversityStavropol

Information systems and technologies Graduation Date: Jul 2019

Regional Multidisciplinary CollegeStavropol

Information systems and technologies Graduation Date: Jul 2015

DESCRIPTION OF PROJECTS

DeliveryCentral

React, Redux Toolkit, Micro Frontends, Webpack, Docker, Gerrit, Jenkins, Git May 2021 - Jul 2023

- Wrote a new productivity section, creating an avant-garde administrative system Data-Connector, using the fascinating art of micro-frontend architecture.
- Visualized GitHub data to show collaboration.
- Created and developed an advanced management system based on complex components such as dynamic trees and smart filters

ALTOVITA

React, Redux Toolkit, Node.js, Express.js, Git Jan 2019 - May 2021

- Designing the architecture of the Admin Data Connector system: exploring seamless integration as a project widget.
- Creating an intuitive interface for the Data Connector project.
- Developing an advanced scraping system that increased the team's productivity by 5 times.
- Developing a smart calendar system: implementing unique logic to improve the room booking process.

SKILLS

TypeScript, JavaScript, HTML/CSS, Sass/SCSS, React, React Native, React Router, Remix.js, Vue, Node.js, MaterialUI, React-Hook-Form, Next.js, React-Query, Bootstrap, Axios, Cypress, Jest, Tailwind CSS Developer, Storybook, Docker, Webpack/Vite, REST API, Node.js, Express.js, MongoDB, PostgreSQL.
