Experience

Full Stack Developer | Alzoughbi SARL | Sep 2025 – Present | Beirut, Lebanon

- Develop and maintain features for the Chance Application mobile platform using React Native, collaborating with Unity developers to deliver cross-platform game integrations.
- Design and maintain scalable RESTful APIs and backend systems using Laravel, PHP, MySQL, and Redis, implementing authentication, payments, notifications, and admin features.
- Lead mobile release cycles, including building, testing, and publishing Android and iOS applications to app stores.
- Manage AWS infrastructure, deployments, and production support while optimizing database performance through indexing and query tuning.
- Collaborate with stakeholders to define requirements, troubleshoot issues, and deliver end-to-end features across the full stack.

Full Stack Developer | Airplus | Nov 2023 – Jan 2025 | Remote, Germany

- Developed and maintained full-stack applications using Laravel, PHP, TypeScript, MySQL, Redis, and TailwindCSS across multiple client projects.
- Built AI-powered systems integrating OpenAI, Gemini, DeepL, and Google Translate for automation of content generation and document translation.
- Designed backend systems and RESTful APIs for a multilingual document processing and translation platform.
- Contributed to a blockchain-based airline ticketing system using Solana, Rust, and Anchor for secure decentralized transactions.
- Built a Chrome extension for automated LinkedIn outreach, integrating external APIs and improving performance through caching and database optimization.

Full Stack Developer | GivTrade | May 2023 – Jan 2024 | Beirut, Lebanon

- Contributed to development of a cryptocurrency trading platform using .NET, React, Angular, TypeScript, and JavaScript.
- Built frontend and backend features, including RESTful APIs, to support trading workflows and core platform functionality.
- Developed responsive interfaces using React and Angular, focusing on usability and performance.
- Worked on Web3/blockchain integrations and supported feature development across design, testing, and deployment cycles.
- Troubleshoot and optimized application performance across .NET, Node.js, and PHP-based services.

Full Stack Developer | MCSS | Nov 2022 – Jun 2023 | Remote, Canada

- Built a full-stack environmental analytics dashboard from scratch using Laravel, PHP, MySQL, React, JavaScript, HTML, and CSS.
- Designed backend systems, RESTful APIs, and calculation engines for processing environmental and operational data.
- Developed interactive dashboards and data visualizations to support reporting and decision-making.
- Designed database structures, optimized queries, and contributed to system architecture for scalability and performance.
- Containerized and deployed applications using Docker while translating business requirements into technical solutions.

ReactJS Developer | OurEasyGame Developer | Mar 2022 – Jun 2022 | Remote, USA (Freelance)

- Developed responsive admin dashboards using ReactJS, JavaScript, HTML, and CSS based on Figma and Sketch designs.
- Built reusable React components and translated UI/UX designs into interactive interfaces.
- Structured frontend architecture to improve maintainability and scalability.
- Delivered features remotely in a project-based environment according to client requirements and deadlines.

Frontend Developer | Hot Reload | Jun 2022 – Sep 2022 | Remote, Lebanon (Freelance)

- Developed frontend components using HTML, CSS, and JavaScript for client-side applications.
- Integrated frontend with .NET and C# backend systems to support full-stack functionality.
- Built responsive interfaces ensuring cross-browser and mobile compatibility.
- Delivered frontend features in a freelance environment while improving UI structure and usability.

Full Stack Developer | AI Gherbal Company | Feb 2022 – Apr 2022 | Beirut, Lebanon

- Developed full-stack features using Laravel, PHP, React, and MySQL for web application functionality.
- Built responsive React components ensuring usability and cross-device compatibility.
- Implemented backend logic and database interactions to support core system features.
- Collaborated with the team to deliver features and fix bugs within project timelines.

Frontend Development Intern | Arcadous Company | Oct 2021 – Nov 2021 | Remote, Lebanon

- Assisted in developing React components using HTML, CSS, and TailwindCSS under senior guidance.
- Implemented Auth0 authentication flows for secure user login and access control.
- Translated UI/UX designs into responsive and accessible web interfaces.
- Gained hands-on experience in React component-based architecture and frontend best practices.

Full Stack Development Program | Codi_Tech Bootcamp | Apr 2021 – Dec 2021 | Beirut, Lebanon

- Completed an intensive 8-month full-stack development bootcamp focused on hands-on, project-based learning across frontend, backend, and DevOps fundamentals.
- Built multiple full-stack applications using Laravel, Node.js, Express, React, React Native, MongoDB, and SQL databases, applying real-world development workflows.
- Gained practical experience with Docker, Linux server management, LAMP stack deployment, Agile methodologies, and CMS development (WordPress).

Projects

Professional Development

AI-Enhanced Senior Track Trainee | Onramp Academy (Forward MENA) | Apr 2026 – Present

- Participating in an advanced engineering program focused on AI-assisted full-stack development, software architecture, security, and DevOps practices.
- Building and analyzing full-stack systems using Node.js, React.js, Next.js, NestJS, Prisma, GraphQL, Docker, databases, and cloud-based architectures.
- Exploring AI engineering concepts including LLM fundamentals, RAG systems, and secure application design with a focus on system performance and scalability.
- Practicing production-level engineering workflows including Git collaboration, code reviews, debugging, and senior-level system design principles.

Education and Qualifications

2020-2022 **Rafic Hariri University - Damour, Lebanon**
Biomedical Engineering

2019: **Alayli High School - Beirut, Lebanon**
Lebanese Official Exams - Life Science Section

Skills

- **Languages:** TypeScript, JavaScript, PHP, C#
- **Frontend:** React.js, React Native, HTML, CSS, TailwindCSS
- **Backend:** Node.js, Laravel, REST APIs
- **Databases:** MySQL, Redis
- **DevOps:** Docker, AWS
- **Blockchain:** Solana, Web3, Rust, Anchor
- **Tools:** Git, Linux

Languages

Arabic: Native

English: Full Working Proficiency
