SUMMARY

Computer Science graduate with hands-on experience designing and developing full-stack web applications. Strong foundation in software engineering principles, object-oriented programming, database design, REST APIs, and modern development tools. Passionate about learning new technologies quickly, solving real-world problems, and building scalable software solutions in collaborative environments.

PROJECTS

AI CV Analyzer | AI-Powered CV Analysis & Job Matching Platform

May 2026 – June 2026

- Developed a full-stack web application for AI-powered CV analysis and job matching using ASP.NET Core Razor Pages, Entity Framework Core, and PostgreSQL.
- Designed RESTful APIs and integrated AI services for skill gap analysis, career recommendations, and job compatibility scoring.
- Implemented secure authentication and role-based authorization using ASP.NET Core Identity.
- Applied Clean Architecture, SOLID principles, and deployed the application with Docker.
