PROFILE

Passionate Computer Science graduate skilled in building full-stack applications from database design to client-side interfaces. Combines solid Object-Oriented principles with a fast learning curve and strong analytical thinking. Looking to apply an adaptable engineering mindset to real-world software projects as a Full-Stack Development Intern.

ACADEMIC PROJECTS

Travel Booking System | Tech Stack: PHP, SQL, JavaScript, HTML5, CSS3

- Developed a full-stack web application enabling users to search and book travel services.
- Designed and implemented relational database tables using SQL to store users, bookings, and destination data.
- Created responsive web pages using HTML5, CSS3, and JavaScript, and integrated backend logic using PHP.

Car Rental Management System | Tech Stack: PHP, SQL, JavaScript, HTML5, CSS3

- Built a web application to manage vehicle rentals, client info, and vehicle availability.
- Implemented backend CRUD functionality with PHP and SQL to process reservation records.
- Designed front-end interfaces using HTML, CSS, and JavaScript for seamless interaction.

UniQuest | Tech Stack: PHP, SQL, JavaScript, HTML5, CSS3

- Constructed an interactive web platform using PHP and JavaScript to support student collaboration.
- Applied JavaScript for client-side form interactions and validation.
- Handled database connection and query processing using PHP and SQL.

STRENGTHS

- Fast learner with strong grasp of Object-Oriented Programming and database fundamentals.
- Comfortable working across the stack — from UI design to backend logic and database structure.
- Team player with experience delivering multiple academic projects under deadlines.
