Work Experience

Quality Assurance Engineer at My Monty

Jun 2025 – Jun 2026

- Own end-to-end QA for e-wallet flows (onboarding/KYC, funding, transfers, bill payments, notifications).
- Author and maintain test cases and user stories in Jira, ensuring full requirements traceability.
- Build Postman suites with parameterized environments for API validation and regression.
- Use SQL to validate back-end data consistency and ensure accurate transactional states.
- Establish baseline JMeter tests for critical endpoints to monitor performance trends.
- Developed and implemented automated test scripts for Android applications using Appium, TestNG, and Java, utilizing both Eclipse and IntelliJ as primary editors to optimize development and testing workflows.
- Leveraged Claude AI to accelerate autonomous QA testing by generating, refining, and maintaining automated test scripts, test cases, test scenarios, and validation workflows, improving testing efficiency and automation coverage.

Freelance QA Engineer – Areeka Care

Dec 2025 - Present

- Managed and tracked issues using Odoo ticketing system
- Performed manual testing on web applications
- Tested website responsiveness across multiple browsers and devices
- Identified, reported, and followed up on bugs to ensure timely resolution
- Collaborated with developers to improve product quality and user experience

Quality Assurance Specialist at Eurisko Mobility

Oct 2021 - Mar 2025

- Conducted comprehensive testing on VOD and E-Learning platforms, focusing on mobile applications (Android/iOS) and responsive web applications across a variety of devices.
- Executed test cases for Samsung, LG, and Android/iOS TV applications, ensuring cross-platform compatibility. Samsung/Lg and IOS/Android TV Testing.
- Authored detailed stories and test cases using Jira for project tracking and task management.
- Reported and tracked software bugs, collaborating closely with the development team to ensure timely resolution.
- Performed API testing using Postman, ensuring accurate and thorough testing of backend services.
- Performed automation testing using Selenium in a Java environment, utilizing Eclipse as the primary editor.
- Designed and implemented BDD-based automated test suites using Webdriver.IO and Cucumber, improving test scalability and maintainability.
- Actively engaged on a major project with Deloitte, applying a high level of accuracy and attention to detail to ensure project success.

Quality Assurance Specialist at WIN Solutions

Jun 2021 - Oct 2021

- Led web application testing for various platforms, focusing on responsive design and multi-device compatibility.
- Developed and maintained comprehensive documentation using Wiki.js, ensuring clear communication of testing processes and outcomes.
- Identified bugs and issues, collaborating with developers to troubleshoot and resolve them effectively.
