JUNIOR BACKEND DEVELOPER

Computer Science graduate and backend developer with hands-on experience in Java, Spring Boot, RESTful APIs, PostgreSQL, and layered architecture. I build reliable, maintainable applications, adapt quickly to new frameworks, and approach technical challenges with confidence and strong problem-solving skills. Beyond software development, I write classical Arabic poetry, which strengthens my creativity, discipline, and attention to detail.

WORK EXPERIENCE

Data Entry: Deal to Deal Apr 2025 - Present

- Enter and validate product, sales, and operational data using Microsoft 365 systems.
- Process sales orders and support accurate order tracking and fulfillment.
- Assist with customer inquiries and coordination to ensure smooth service.
- Manage daily administrative tasks while maintaining accuracy and efficiency.

Online Clothing Business | Founder & Manager Oct 2025 – Feb 2026

- Launched and managed an online clothing store, handling inventory, listings, and orders.
- Built and customized a Shopify website to support online sales.
- Created product promotions and managed social media marketing.
- Handled customer communication, order processing, and basic branding activities.
- Gained practical experience in e-commerce, digital marketing, and business operations.

Software Developer Intern: Smart Secure Solutions Aug 2024 – Jan 2025

- Researched modern web and mobile technologies, including Laravel, Flutter, Node.js, Angular, Firebase, and AWS.
- Studied Agile development practices to support teamwork and project organization.
- Documented technical findings and best practices for scalable application development.
- Analyzed technical tools and summarized best practices for scalable applications.
- Strengthened research, documentation, collaboration, and problem-solving skills.

RELEVANT PROJECTS

Fintech Application

- Developed a fintech application using Spring Boot and RESTful APIs to manage accounts, cards, users, and transactions.
- Integrated PostgreSQL with Spring Data JPA and applied layered architecture using Controller, Service, and Repository patterns.
- Tested and documented APIs using Swagger UI for clear and efficient endpoint validation.

Quranic Mobile Application (Team Project)

- Collaborated with a team to develop a Quranic mobile application using Flutter, contributing to UI development and feature implementation.
- Implemented Riverpod for efficient state management and used GitHub for version control, and collaboration.
- Supported organized project workflow through teamwork, clean structure, and regular code updates.

Cross-Platform To-do list application

- Developed a cross-platform task management application for web and mobile using Angular, Laravel, Flutter, and Node.js.
- Integrated both platforms with a shared MySQL database and RESTful APIs for synchronized task management.
- Applied modular architecture to improve maintainability, scalability, and overall application performance.

EDUCATION

Bachelor of Science in Computer Science,

Lebanese International University,
Graduation Year: 2024 | GPA: 3.32

SKILLS

Technical Skills: Java, Spring Boot, RESTful APIs, Spring Data JPA, PostgreSQL, MySQL, Node.js, Laravel, Object-Oriented Programming, Layered Architecture, Database Integration, Git, GitHub, Postman, Swagger UI, Firebase, AWS.

Professional Skills: Problem Solving, Analytical Thinking, Team Collaboration, Adaptability, Technical Research, Documentation, Time Management, Communication, Attention to Detail.
