EDUCATION

Bachelor's Degree of Computer Sciences 09/2021 – 06/2025
Beirut, Lebanon

PROFESSIONAL EXPERIENCE

Full Stack Developer, WeaveWider 03/2026 – 06/2026
Dubai, UAE

- Contributed to the development of the Yubai mobile application using Flutter, with backend services built in Node.js and Spring Boot.
- Implemented core e-commerce features similar to Amazon and Sephora, including multi-currency and multi-language support, product data integration via Actowiz APIs, and improved UI/UX across the app.
- Enhanced order tracking and shipment creation workflows, integrated OMT, Wish, and Stripe payment gateways, and optimized the system architecture for better scalability.

Software Developer, DoorEast 01/2026 – 04/2026
Hazmieh, Lebanon

- Developed and maintained features for the Flutter mobile application, improving functionality and overall user experience.
- Enhanced the Laravel backend by improving the roles and permissions system and refactoring API responses to increase performance and loading speed.
- Implemented advanced Angular frontend enhancements, UI fixes, and feature updates, while also developing Python-based scraping and automation tools to extract and process property data from documents and major real estate platforms.

Full Stack Developer, Forex-Flow Community 05/2025 – 08/2025
Beirut, Lebanon

- Collaborated on a forex education and signal tracking platform using Angular and Spring Boot for real time pip tracking and community features
- Developed and maintained core modules for daily signal distribution, pip analytics, and user management, improving trader engagement and retention
- Applied best practices in Spring boot architecture and Angular state management under senior developer mentorship, strengthening code quality, scalability, and performance

Frontend Developer, Smart Tech Company 05/2024 – 08/2024
Beirut, Lebanon

- Developed a fully functional eCommerce web application using Angular js as part of internal training, implementing responsive UI and modular components
- Contributed to the company’s proprietary ERP system, delivering new features and UI enhancements with a focus on usability and performance
- Applied modern design patterns using Angular with TypeScript, improving code scalability, maintainability, and developer experience

SPECIAL PROJECTS

Al Wakeel Insurance, Spring Boot, Flutter 07/2025 – Present

- Developed a full-stack insurance application using Flutter (GetX) and Spring boot, supporting multiple policy types, real-time premium calculations, and secure document submission.
- Implemented API authentication, digital verification, and broker management, reducing policy issuance time by 60%.
- Delivered a multi-language, compliance-ready system with dynamic pricing and tiered insurance packages.

MU Connect, Spring Boot, AngularJs 02/2025 – 06/2025

- Built a university-wide community platform using Spring Boot and Angular, enabling students to connect, share resources, and collaborate across faculties.
- Enhanced students’ social experience and streamlined student affairs processes through modules for posts, events, discussions, and course management.
- Awarded Top Project of the University for delivering an innovative solution that improved communication, engagement, and campus connectivity.
